2nd Floor Durham City Hall**

1. Roll Call**2. Ethics Reminder**

In accordance with the State Government Ethics Act, it is the duty of every Board member to avoid conflicts of interest. Does any Board member have any known conflict of interest with respect to any matters coming before the Board today? If so, please identify the conflict and refrain from any participation in the particular matter involved.

3. Adjustments to the Agenda**4. Public Comments****CONSENT AGENDA****5. Approval of September 25, 2013 TCC Meeting Minutes****Attachment 5**

A copy of the September 25, 2013 minutes is enclosed as Attachment 5.

TCC Action: Approve minutes of the September 25, 2013 TCC meeting.

6. FY 2012-2018 Transportation Improvement Program Amendment #13**Attachment 6**

Ellen Beckmann, LPA Staff

Amendment #13 is necessary to add Triangle Transit's Section 5339 Funding and match recent amendments and modifications to the State TIP. Triangle Transit plans to use Section 5339 funding to rehabilitate buses and rehabilitate their maintenance facility. The State TIP amendments and modifications include:

- Modifying the I-40 and I-540 Managed Lanes project to note that it is scheduled for a feasibility study
- Delaying the American Tobacco Trail Parking Lot in Chatham County
- Deleting a bridge replacement on Old Greensboro Road
- Adding funding for two statewide rail projects.
- Deleting a statewide safety project.

TCC Recommendation: Recommend that the TAC approve the Resolution to Modify the 2012-2018 Transportation Improvement Program for the Durham-Chapel Hill-Carrboro Metropolitan Planning Area Amendment #13.

ACTION ITEMS**7. 2013 Coordinated Public Transportation – Human Services Transportation Plan (CPT-HSTP)****Attachment 7, 7A****Sherry Taylor Lewis, LPA Staff****Travis Pollack, Gannett Fleming**

In 2007, the DCHC MPO adopted a Coordinated Public Transportation-Human Services Transportation Plan (CPT-HSTP) to fulfill requirements of SAFETEA-LU, federal transportation law. The purpose of a CPT-HSTP is to improve transportation services for persons with disabilities, older adults, and low-income individuals through a better coordinated transportation system. CPT-HSTPs coordinate fixed-route transit, paratransit, and transit services provided by local agencies and non-profits. Plan updates are mandatory every five years to identify needs of the transportation disadvantaged.

The current Moving Ahead for Progress in the 21st Century (MAP-21) federal transportation legislation continues the requirement for coordinated public transportation plans. The 2013 CPT-HSTP Update draft was developed by the Gannett Fleming consulting firm. Representatives from Gannett Fleming will give a presentation highlighting the purpose of the plan, results of the workshop, and changes in grant funding.

CPT Update Timeline:

- November 13, 2013 TAC – release for 30-day public comment period
- December 10, 2013 TAC – public hearing
- January 8, 2014 TAC - approval

TCC Recommendation: Receive presentation. Review draft and recommend that the TAC release the draft 2013 CPT-HSTP Update for public comment.

8. Prioritization 3.0**Attachment 8, 8A, 8B, 8C****Andy Henry, LPA Staff****Ellen Beckmann, LPA Staff**

A TCC Subcommittee met on October 16, 2013 to discuss Prioritization 3.0, STP-DA, and Transportation Alternatives Program (TAP). Notes from this meeting are provided as Attachment 8. These notes include several timelines for the many Prioritization processes.

A table of highway projects that were submitted for Prioritization 2.0 is included in Attachment 8A. Strikethrough projects are modernization projects that NCDOT has determined are primarily bicycle/pedestrian projects and will be removed. The MPO may submit these projects as bicycle/pedestrian projects. All other projects will remain in the database for Prioritization 3.0. Attachment 8B is a table of projects in the 2040 MTP. Projects that are not currently in the Prioritization 2.0 database are highlighted. Nineteen additional projects can be submitted by the MPO.

The transit operators developed project lists and submitted them to MPO staff. A compilation is included as Attachment 8C. LPA staff expect to receive submittal instructions soon as projects are due by November 15, 2013. The TAC will review this list at their November meeting. The TAC released a draft list of bicycle and pedestrian projects for local government review and comment in October. The local governments can add, delete, and modify projects in this list. As discussed at the subcommittee meeting, local governments are requested to prioritize their top four (Orange and Chatham county governments) or eight (Durham county governments) projects for consideration by December 1, 2013. The TCC and LPA staff will develop a selection process for developing a recommended list of 20 projects for the MPO by December 18, 2013.

TCC Action: Receive update and recommended that the TAC endorse the list of transit projects for submission to NCDOT. Direct Subcommittee to meet to develop recommended list of bicycle and pedestrian and highway project submittals.

9. STP-DA and Transportation Alternatives Program (TAP)

Attachment 8, 9

Andy Henry, LPA Staff

Ellen Beckmann, LPA Staff

A TCC Subcommittee met on October 16, 2013 to discuss Prioritization 3.0, STP-DA, and Transportation Alternatives Program (TAP). Notes from this meeting are provided as Attachment 8. A Call for Projects will be held to program STP-DA and TAP funding in FY 2015 and 2016. Funding included in this Call for Projects will be the MPO's unobligated STP-DA balance (\$9.6 Million as of July 2013), estimated FY 15 and 16 STP-DA (\$4.4 Million annually), FY 13 and 14 TAP (\$351,000 annually), and estimated FY 15 and 16 TAP (also \$351,000 annually). The TCC will make a recommendation for funding by early spring 2014.

The Subcommittee recommends that local governments recommend transit, bicycle, pedestrian, and planning projects for consideration for funding with STP-DA and TAP funding at the same time that they develop their priority lists for Prioritization 3.0. Local governments in Orange and Chatham counties should recommend up to six additional bicycle/pedestrian projects (10 total), and local governments in Durham County should recommend up to 12 additional bicycle/pedestrian projects (20 total). Transit projects will be considered from the transit project lists (Attachment 8C).

The TCC will need to revise the current policy for the distribution of STP-DA funding (Attachment 9) to include a competitive process for TAP, establish a minimum project size, create more incentives for the timely obligation of funding, better incorporate the time-consuming federal authorization process, better address potential cost over-runs, and consider adjustments to the distribution formula among project types and recipients.

TCC Recommendation: Receive update. Direct Subcommittee to meet to develop policy for distribution of funding.

49 Quorum Count: 22 of 25 Voting Members

50
51 Mark Ahrendsen, TCC Chair, called the meeting to order at 9:08 a.m. The Alternate Voting
52 Members were identified and indicated above.

53 **PRELIMINARIES:**

54 **Ethics Reminder**

55 In accordance with the State Governmental Ethics Act, it is the duty of every Board member
56 to avoid conflicts of interest. Does any Board member have any known conflict of interest with
57 respect to any matters coming before the Board today? If so, please identify the conflict and refrain
58 from any participation in the particular matter involved. There were none.

59 **Adjustments to the Agenda**

60 Andrew Henry requested to add an item to the end of the agenda to discuss and vote on the
61 bicycle and pedestrian projects to be released by the TAC, so each respective local jurisdiction can
62 obtain feedback to enter them into the SPOT Prioritization process.

63 John Hodges-Copple requested to provide an update on the status of the SPOT Workgroup at
64 the end of the meeting as an informational item.

65 **Public Comments**

66 There were no comments from the public.

67 Mark Ahrendsen acknowledged and welcomed the attendance of the UNC Chapel Hill class
68 that was in attendance observing the TCC Meeting.

69 **CONSENT AGENDA:**

70 **Approval of August 28, 2013 TCC Meeting Minutes (Attachment 5)**

93 Julie Bollinger requested a grammatical correction be made to change the word “chose” to
94 “choose” on page 10, line 18. Brett Martin also identified a grammatical error on page 5, line 17 and
95 requested to delete the word “be” from the sentence in attachment 6B.

96 A motion was made by David Bonk to forward the MOU to the TAC for review and
97 consideration to be released for execution review, and seconded by Pierre Osei- Owusu. The motion
98 carried unanimously.

99 **FY 2012-2018 Transportation Improvement Program – Amendment #12 (Attachment 7)**

100 Dale McKeel introduced the amendment to the 2012 -2018 TIP to permit Chapel Hill Transit
101 to use FY 2014 Section 5339 funds and recommended approval.

102 A motion was made by David Bonk to approve the amendment to the TIP, and seconded by
103 Felix Nwoko. The motion carried unanimously.

104 **FY 2012-2013 STP-DA Project Change Requests (Attachment 8, 8A)**

105 Felix Nwoko provided a status update on various projects that were scheduled for FY2012-
106 2013 that are moving forward, as well as various projects that will not be moving forward. Felix
107 Nwoko referred to Attachment 8 for further explanation. The recommendation is to move projects
108 that have not been obligated from FY2013 to FY2014. Felix Nwoko also requested to have the sub-
109 committee review the STP-DA program. David Bonk agreed to have the sub-committee review the
110 status of the STP-DA program with regard to projects that have been allocated but not yet expended,
111 the amount of funds received over the period that was projected, as well as the direction going
112 forward with the remaining funds from the STP-DA program. David Bonk requested that Andrew
113 Henry coordinate a meeting with the subcommittee within the next few weeks.

114 **SPOT Prioritization Projects Update**

115 Andrew Henry requested to have the identified bicycle and pedestrian SPOT projects
116 submitted to the TAC in October. A motion was made by Felix Nwoko to authorize the LPA to

117 forward the combined bicycle and pedestrian project list to the TAC for their consideration to be
118 released, and seconded by David Bonk. The motion carried unanimously.

119 **SPOT Workgroup Update**

120 John Hodges-Copple provided information about the SPOT workgroup reaching a consensus
121 on how the local share of points are divided between the MPOs , RPOs, and the Division Engineers.
122 On the regional scale there is a total of 30% which has been divided into 20% for the MPOs/RPOs and
123 10% for the Division Engineers. On the division needs scale there is a total of 50% which has been
124 divided into 30% for the MPO/RPO and 20% for the Division Engineers. There are continued
125 discussions about the normalization minimum, which will be revisited at the next meeting.

126 Jeff Brubaker asked if the committee discussed the TREDIS model and how it is being used in
127 this process. John Hodges-Copple stated the he was not aware of any discussions on the TREDIS
128 model.

129 **REPORTS FROM STAFF:**

130 **Reports from Staff**

131 Andrew Henry provided information about the award received for innovations in planning at
132 the APA Conference for the Community Visualization Effort on the Regional Land Use Model in the
133 Triangle.

134 **Report from the Chair**

135 There was nothing to report from the Chair.

136 **NCDOT Reports (Attachment 11)**

137 Darius Sturdivant, Division 8, referred to the project list provided in attachment 11 and
138 confirmed the project completion dates for Jack Bennett Road as well as the resurfacing project.
139 Darius Sturdivant provided an update on the American Tobacco Trail project and stated the project
140 has been delayed and construction has been tentatively scheduled to begin by the end of 2013

141 pending approval of funding. The US 15-501 Corridor study is currently undergoing review to ensure
142 that the findings match what the Town of Pittsboro has documented and approved. This process
143 should be completed within a couple of weeks and a second committee meeting will be scheduled.

144 David Bonk mentioned the discrepancy in the 2040 projected numbers that are in the draft
145 report and stated that reconciliation between the numbers in the adopted spreadsheet and the
146 numbers in the model must be done. John Hodges-Copple referred members to the visit the Triangle
147 J COG website for the final numbers from December 2012 that were used for the 2040 MTP.

148 Darius Sturdivant advised the committee about the new Division Engineer (Rob Stone).

149 **INFORMATIONAL ITEMS:**

150 Mark Ahrendsen provided a reminder about the ribbon cutting ceremony for the last
151 segment of the American Tobacco Trail project in Durham County to be held on October 12, 2013 at
152 9 AM at the Streets of South Point.

153 John Hodges-Copple informed the committee that CAMPO is going through an Air Quality
154 conformity process for the I-440 rebuild due to a change in the design.

155 Jeff Brubaker informed the committee about the Statewide North Carolina Bike Summit
156 October 18th through 20th in Carrboro at the Hampton Inn & Suites. Registration is still open. Jeff
157 Brubaker provided the website (ncbikesumit.org) for additional information.

158 David Bonk informed the committee about the first bike corral (designated parking area for
159 bicycles) on a state street (Franklin Street) in Chapel Hill.

160 **Adjournment**

161 There being no further business before the Technical Coordinating Committee, the meeting
162 was adjourned at 10:34 a.m.

**RESOLUTION TO MODIFY THE 2012-2018 TRANSPORTATION
IMPROVEMENT PROGRAM FOR THE DURHAM-CHAPEL HILL-CARRBORO
METROPOLITAN PLANNING AREA**

**AMENDMENT #13
November 13, 2013**

A motion was made by TAC Member _____ and seconded by TAC Member _____ for the adoption of the following resolution, and upon being put to a vote, was duly adopted.

WHEREAS, the Metropolitan Transportation Improvement Program (MTIP) is a staged multiple year listing of all federally funded transportation projects scheduled for implementation within the Durham-Chapel Hill-Carrboro Metropolitan Planning Area which have been selected from a priority list of projects; and

WHEREAS, the document provides the mechanism for official endorsement of the program of projects by the Transportation Advisory Committee (TAC); and

WHEREAS, the inclusion of the TIP in the transportation planning process was first mandated by regulations issued jointly by the Federal Highway Administration (FHWA) and the Federal Transit Administration (FTA) and no project within the planning area will be approved for funding by these federal agencies unless it appears in the officially adopted TIP; and

WHEREAS, the procedures for developing the MTIP have been modified in accordance with certain provisions of the SAFETEA-LU Federal Transportation Act and guidance provided by the State; and

WHEREAS, projects listed in the MTIP are also included in the State TIP (STIP) and balanced against anticipated revenues as identified in the STIP; and

WHEREAS, the North Carolina Department of Transportation and the Transportation Advisory Committee have determined it to be in the best interest of the Urban Area to amend the FY 2012-2018 Metropolitan Transportation Improvement Program as described in the attached sheets; and

WHEREAS, there has been no change in the MTIP project schedule or project design concept and scope with regard to the air quality conformity finding made by the Durham-Chapel Hill-Carrboro Metropolitan Planning Organization Transportation Advisory Committee on May 8, 2013; and

WHEREAS, the DCHC MPO certifies that this MTIP amendment is consistent with the intent of the DCHC MPO 2040 Metropolitan Transportation Plan (MTP); and

BE IT THEREFORE RESOLVED that the Durham-Chapel Hill-Carrboro Metropolitan Planning Organization Transportation Advisory Committee hereby amends the FY 2012-2018 Metropolitan Transportation Improvement Program of the Durham-Chapel Hill-Carrboro Urban Area, as approved by the TAC on September 14, 2011, and as described in the “Attachments to Resolution for Amendment #13 to DCHC 2012-2018 MTIP” provided here on this, the 13th day of November, 2013.

Ellen Reckhow, TAC Chair

Durham County, North Carolina

I certify that Ellen Reckhow personally appeared before me this day acknowledging to me that she signed the forgoing document.

MEMORANDUM

To: Technical Coordinating Committee (TCC)
DCHC MPO

From: DCHC MPO Lead Planning Agency

Date: October 23, 2013

Subject: **2013 Coordinated Public Transportation- Human Services Transportation Plan Update**

Background

In 2007, the DCHC MPO adopted a Coordinated Public Transportation-Human Services Transportation Plan (CPT-HSTP) to fulfill requirements of SAFETEA-LU, federal transportation law. The purpose of a CPT-HSTP is to improve transportation services for persons with disabilities, older adults, and low-income individuals through a better coordinated transportation system. CPT-HSTPs coordinate fixed-route transit, paratransit, and transit services provided by local agencies and non-profits.

The current Moving Ahead for Progress in the 21st Century (MAP-21) federal transportation legislation continues the requirement for coordinated public transportation plans. Human service transportation projects funded by Federal Transportation Administration (FTA) grants must be derived from priorities identified in a CPT-HSTP. Federal law also requires that the plan be developed locally “through a process that includes representatives of public, private, and non-profit transportation and human services providers and participation by the public.” Plan updates are mandatory every five years to identify needs of the transportation disadvantaged. Additionally, the CPT-HSTP will help guide decision making and the selection of transit projects supported by FTA funds.

The FTA proposes that the following key elements be included in each locally coordinated plan:

- Assessment of transportation needs for individuals with disabilities, older adults, & persons with limited incomes
- Inventory of available services that identifies redundant service or gaps in service
- Strategies to address the identified gaps in service
- Identification of coordination actions to eliminate or reduce duplication of services and strategies for more efficient utilization of resources
- Prioritization of implementation strategies

2013 Update Process

The 2013 CPT-HSTP Update draft was developed by the Gannett Fleming consulting firm. The consultants facilitated a workshop on September 13, 2013 to identify human service transportation needs and prioritize them. Over 34 participants attended, representing transit providers, social service agencies, private transportation providers, hospitals, advocates for persons with disabilities, and non-profit organizations.

Workshop participants were presented with the purpose of human services transit planning and recommendations from the 2007 CPT-HSTP. They identified changes (improvements and worsening conditions) since 2007 and the current needs within the region. To prioritize the lengthy list of current needs, participants were provided with four yellow dots to indicate those of greatest importance. Additionally, participants were able to isolate the most significant “top” need with a red dot. Participants were then given the opportunity to pinpoint specific strategies to the most pressing needs. The top priority needs are listed below:

- Better amenities at transit stops
- Education and outreach (including travel training)
- Coordination with colleges and universities
- Services for seniors
- Better coordination and connection between transit systems
- Improved funding opportunities for transit
- Rural Services and rural-urban connections

The 2013 Update also includes demographic analysis of the MPO and overview of changes to grant funding due to the MAP-21 legislation. The Job Access and Reverse Commute (JARC Section 5316) and the New Freedom (Section 5317) grants have ended as distinct programs. Transit activities previously eligible under those grants will be funded by other FTA programs. The JARC grants were distributed to improve access to transportation services to employment for low-income individuals and connect residents to suburban employment opportunities. The New Freedom program helped individuals with disabilities connect with services for work and other transit trips.

<i>Previous Grant Program</i>	<i>New MAP-21 Grant Programs</i>
JARC activities	Section 5307 – Urbanized Area Formula grant
JARC activities	Section 5311 – Rural Area Formula grant
New Freedom activities	Section 5310 – Elderly Individuals and Individual with Disabilities program

Coordinated Public Transportation

Human Service Transportation Plan Update

This page left intentionally blank.

The Durham-Chapel Hill-Carrboro Metropolitan Planning Organization (DCHC MPO) adopted a Coordinated Public Transportation - Human Service Transportation Plan in 2007 (referred to in this document as the 2007 Plan). This document is an update of that 2007 Plan, and was developed to reflect changes in federal grant programs, as well as changes in the needs of the transportation disadvantaged populations in the MPO area.

The purpose of the 2007 Plan and this 2013 Plan Update is "to help improve transportation services for persons with disabilities, older adults, and individuals with lower incomes in the Durham, Orange and Chatham County area through a better coordinated transportation system."

This 2013 Plan Update will provide a framework for the development of projects that will address the transportation needs of the target populations, by ensuring that this three-county area and its public transportation and human service agencies coordinate transportation resources offered through multiple FTA programs. Three target populations are particularly relevant to this 2013 Plan Update:

- Seniors (ages 65 and older)
- Low-Income Households
- Persons with Disabilities

Ultimately, this plan will be a list of needs that can be used by the MPO and transit providers to evaluate and rank projects eligible for various federal transportation grants.

Federal law requires that the coordinated public transportation - human service transportation plan (CPT-HSTP) be developed through a process that includes representatives of public, private, and non-profit transportation and human services providers and participation by the public. To assess the transportation needs for the targeted populations in the MPO region, this plan update analyzed available demographic data, reviewed the findings from the 2007 Plan, analyzed changes since 2007, reviewed other available data and plans, and engaged stakeholders via a survey and workshop. The primary findings of this effort are:

- The coordination and cooperation of transit services has improved.
- Several initiatives have successfully improved the delivery of services to targeted populations.
- Greater cooperation and coordination of human service and rural transit systems is needed.
- Better outreach, education and training is needed.
- The needs of transportation disadvantaged populations continues to grow in the region.

The recommendations derived by the planning process for this 2013 Plan Update are categorized under five general areas of need:

- Education and Outreach
- Access to Services
- Coordination and Cooperation
- Alternative Funding
- Rural-Urban Connections

A list of possible actions is provided, but transit agencies, human services providers, and area non-profits should develop any and all activities that can meet these needs.

1. Introduction and Background

1.1 MPO Transit Planning Requirements

The Durham-Chapel Hill-Carrboro Metropolitan Planning Organization (DCHC MPO) region includes several transit operators that provide transportation services to the general population. The available transit services include not only fixed-route bus services for the general public, but also services from local agencies and non-profits that are designed to meet the needs of the region's transportation disadvantaged population. This population includes older adults, persons with disabilities, and individuals with lower incomes, and these services are commonly known as *human service transportation*.

Systems for both the general public and human service rely on state and federal funding for much of their operations and capital expenses. Under federal law, human service transportation projects that are funded by certain federal grant programs must be derived from a coordinated human service and public transit plan. The DCHC MPO is the regional government organization responsible for transportation planning for the western portion of the Research Triangle area in North Carolina, including coordinated human services transit planning.

The DCHC MPO includes all of Durham County, most of Orange County, including the towns of Chapel Hill, Carrboro and Hillsborough, and northeast Chatham County (Figure 1-1). The DCHC MPO is an umbrella organization comprised of the Transportation Advisory Committee (TAC), the Technical Coordinating Committee (TCC), local governments, and the State. The TAC, designated by the Governor, is a policy body that coordinates and makes decision on transportation planning issues. Under federal law, any urbanized area (as defined by the Census Bureau) exceeding a population of 50,000 shall have an MPO whose purpose is to coordinate transportation planning among the member governments. The MPO is charged with the responsibility of preparing and adopting the long range transportation plan for its area, as well short range planning efforts. Those planning efforts include development of a coordinated public transportation - human service transportation plan.

The DCHC MPO adopted a Coordinated Public Transportation - Human Service Transportation Plan (CPT-HSTP) in 2007 (referred to in this document as the 2007 Plan). This document is an update of that 2007 Plan, and was developed to reflect changes in federal grant programs, as well as changes in the needs of the transportation disadvantaged populations in the MPO area.

1.2 Federal Funding Requirements

There have been several federal programs that are used by urban and rural transit systems to help fund both general public/fixed route and human service transportation services. Beginning with the 1998 federal Transportation Equity Act for the 21st Century (TEA-21), the federal government required that transit projects funded under the Job Access and Reverse Commute program (Section 5316) of the federal law be part of a locally coordinated human service transportation plan. Subsequent federal legislation has expanded the planning requirement to other federal transit grant programs.

In 2004, a presidential Executive Order was signed to improve the public and human service transportation coordination of individuals with disabilities, older adults, and people with lower incomes, and establish the federal Interagency Transportation Coordinating Council on Access and Mobility (CCAM). This council includes representatives from not only the US Department of Transportation, but also from Health and Human Services, Education, Labor, Veterans Affairs, Agriculture, Housing and Urban Development, Interior and Justice, as well as from the Social Security Administration and the National Council on Disability.¹

In 2005, the CCAM issued a report to the President with recommendations for breaking down federal barriers to transportation for all transportation-disadvantaged populations which resulted in the development of United We Ride (UWR). UWR is a federal inter-agency initiative to improve availability, quality and efficient delivery of transportation for older adults, and people with disabilities or lower incomes.

Travel training by the Durham Center for Senior Life is just one of the activities funded by the MPO under a New Freedom grant (photo source: Durham Center for Senior Life)

With the passage of the federal transportation law known as SAFETEA-LU in 2005, transit projects receiving Federal Transit Administration (FTA) programs funds must be “derived from a locally developed, coordinated public transit - human services transportation plan.”² Further, the law requires that this plan be “developed through a process that includes representatives of public, private, and nonprofit transportation and human services providers and participation by the public.”³ SAFETEA-LU required projects that receive funding from the following funding programs be developed from a locally adopted CPT-HSTP:

Elderly Individuals and Individuals with Disabilities (Section 5310): This program funds improvements to the mobility of elderly individuals and individuals with disabilities. Agencies often used these funds to purchase vehicles for governments and non-profits.

Job Access and Reverse Commute - JARC (Section 5316): This program was devised to improve access to transportation services to employment for low-income individuals, and to help connect residents of urbanized areas and non-urbanized areas to suburban employment opportunities.

New Freedom (Section 5317): This program was developed to help integrate individuals with disabilities into the workforce and into society overall.

Under SAFETEA-LU, the DCHC MPO has allocated federal funds from the JARC and New Freedom programs to eligible recipients within the MPO, and has used the 2007 Plan to help prioritize and select the transit activities funded through the JARC and New Freedom programs.

² http://www.fta.dot.gov/13093_8196.html

³ <http://www.ncdot.gov/nctransit/download/GuideOverview.pdf>

On October 1, 2012 the Moving Ahead for Progress in the 21st Century (MAP-21) replaced SAFETEA-LU as the federal transportation funding legislation. MAP-21 ended both JARC and New Freedom as distinct programs. Activities previously funded under JARC are eligible activities under two other FTA programs within MAP-21: the Urbanized Area Formula grants (Section 5307) and Rural Area Formula grants (Section 5311). Activities previously funded under New Freedom are also eligible under the Elderly Individuals and Individuals with Disabilities program (Section 5310). MAP-21 continues the requirement for coordinated public transportation - human service transportation plans for transit programs. Therefore, the DCHC MPO is updating the 2007 Plan to meet the requirements of MAP-21 and to assist in the selection of transit activities supported by FTA funds.

2. Plan Purpose

The purpose of the 2007 Plan and this 2013 Plan Update is "to help improve transportation services for persons with disabilities, older adults, and individuals with lower incomes in the Durham, Orange and Chatham County area through a better coordinated transportation system."⁴ Several of the needs identified through the 2007 planning process and 2013 Plan Update process are applicable to all potential transit users, both the target populations (older adults, individuals with disabilities, and individuals with lower incomes) and the general public. As such, the possible strategies to address the identified needs would improve the transit system for the broader community in the MPO region.

The purpose of this plan is to help improve transportation services for persons with disabilities, older adults and individuals with lower incomes in the Durham, Orange and Chatham County area through a better coordinated transportation system.

As the area's regional transportation planning organization, the DCHC MPO has led the effort in developing the 2007 Plan and this 2013 Plan Update. The DCHC MPO has worked in collaboration with the public transportation agencies, other social agencies and non-profits in the MPO's jurisdiction to develop the plan and to respond to the requirements under both SAFETEA-LU and MAP-21.

This 2013 Plan Update will provide a framework for the development of projects that will address the transportation needs of the target populations, by ensuring that this three-county area and its public transportation and human service agencies coordinate transportation resources offered through multiple FTA programs.

⁴ Durham-Chapel Hill-Carrboro Metropolitan Planning Organization Coordinated Public Transportation - Human Services Transportation Plan, March 14, 2007.

3. Planning Process

Federal law requires that the coordinated public transportation - human service transportation plan be developed through a process that includes representatives of public, private, and non-profit transportation and human services providers and participation by the public. Furthermore, the plan should "identify the transportation needs of individuals with disabilities, older adults, and people with low incomes, provide strategies for meeting those local needs and prioritize transportation services for funding and implementation".⁵ FTA proposes that the following key elements be included in each locally coordinated plan:

- An assessment of transportation needs for individuals with disabilities, older adults, and persons with limited incomes;
- An inventory of the available services that identifies areas of redundant service and gaps in service;
- Strategies to address the identified gaps in service;
- Identification of coordination actions to eliminate or reduce duplication in services and strategies for more efficient utilization of resources; and
- Prioritization of implementation strategies.

Federal law requires that the coordinated public transportation - human service transportation plan be developed through a process that includes representatives of public, private, and non-profit transportation and human services providers and participation by the public.

⁵ FTA Circular C9070.1F

This Plan Update was developed as update to the 2007 Plan; therefore, the planning process included a review of the findings and recommendations from the 2007 Plan, as well as a review of activities selected by the MPO for JARC and New Freedom funding since 2007. Other elements of this Plan include a review of available transit services, a workshop to identify needs and possible strategies to meet those needs, a survey of transit providers and area human services agencies, and prioritization of the implementation strategies. These elements are described in greater detail in the following sections.

4.1 Federal Transit Funding

As noted previously, the 2007 Plan for the Durham-Chapel Hill-Carrboro MPO was developed to help guide the decision making for awarding JARC and New Freedom grants through the MPO, as required under SAFETEA-LU. On October 1, 2012, MAP-21 became the new federal transportation law, and made changes to the funding programs. Specifically, both JARC (Section 5316) and New Freedom (Section 5317) were eliminated. Projects previously eligible for JARC are now eligible under Urbanized Area Formula Grants (Section 5307). Projects previously eligible for New Freedom funding can now be funded under the Enhanced Mobility of Seniors and Individuals with Disabilities program (Section 5310). MAP-21 still requires that projects funded by these FTA grants must be derived from a comprehensive human service transportation plan.⁶

The following FTA funding programs are available to the transit agencies in the DCHC MPO region to assist in providing transportation services to the targeted groups.

Urbanized Area Formula Grants (Section 5307): This program provides grants to urbanized areas (population of 50,000 or more) to support public transportation. Transit systems that operate no more than 100 buses may use a portion of these funds for operating expenses. Activities eligible under the former JARC program are now eligible under this program. There is no minimum or maximum on the amount of funds that can be spent on job access and reverse commute activities. The number of low-income individuals in the urbanized area is now a factor in the formula for distributing Section 5307 funds.

⁶ http://www.fta.dot.gov/documents/MAP21_essay_style_summary_v5_MASTER.pdf

Enhanced Mobility of Seniors and Individuals with Disabilities (Section 5310): This program provides funds to programs that enhance the mobility for older adults and individuals with disabilities. It is intended to serve the needs of transit-dependent populations beyond traditional public transportation services and Americans with Disabilities Act (ADA) complementary paratransit services. Eligible activities include both capital and operating expenses. Moreover, activities eligible under the former New Freedom program are now eligible under the Enhanced Mobility of Seniors and Individuals with Disabilities program, and up to 45 percent of the Section 5310 funds may be used for activities would have been eligible for New Freedom funding.

More information on each section of MAP-21 and its application to transit can be found at <http://www.fta.dot.gov/about/15035.html>. In addition to the Federal funds, there is state funding provided through the North Carolina Department of Transportation (NCDOT) to local transit agencies⁷ via the following state grant programs:

1. Rural Operating Assistance Program (ROAP) - includes the Elderly and Disabled Transportation Assistance Program, the Rural General Public Program and the Employment Transportation Assistance Program
2. State Maintenance Assistance Program (SMAP)- includes the Urban/Regional Bus and Facility Program, and the Urban/Regional Technology Program
3. Public Transportation Grant Program - includes the Apprentice and Intern Program and the Transportation Demand Management Program

4.2 MPO Role

Under the previous federal transportation funding law (SAFETEA-LU), the DCHC MPO was the recipient of the New Freedom and JARC programs and distributed these funds to transit providers, other government agencies and non-profits based upon a competitive selection process that measured how well the proposed activity would meet the needs identified in the 2007 CPT-HSTP.

⁷ <http://www.ncdot.gov/nctransit/download/programsfunding.pdf>

As noted earlier, the JARC and New Freedom programs have been incorporated into the other federal transit grant programs (Section 5307 and Section 5310). The role of the MPO under Federal law is different for these two programs, and is described below.

Section 5307 (Urbanized Area Formula Grants) - For the DCHC MPO area, the City of Durham is the Designated Recipient of Section 5307 funds, who then apportions these funds to the transit agencies, such as DATA and Chapel Hill Transit. Chapter 53 of Title 49 (as amended under MAP-21) states that a "Designated Recipient" is "the entity designated by the Governor of a State, responsible local officials, and publicly owned operators of public transportation, to receive and apportion" the funds made available by Congress and the FTA to a transportation management area.⁸ The transit agencies who receive the funds from the Designated Recipient are often identified as "direct recipients" of the FTA funds. FTA guidance for Section 5307 describes a direct recipient as "a public entity that is legally eligible under Federal transit law to apply for an receive grants directly from FTA." The guidance further notes that the amount of FTA funds available to the direct recipients is determined cooperatively by the MPO and the Designated Recipients and then communicated to FTA by the Designated Recipient.⁹ (It should be noted that, for the purposes of the DCHC MPO area, the City of Durham/DCHC MPO is the Designated Recipient of the Section 5307 funds. However, federal law allows for other governing entities to be identified as the Designated Recipient, such as a regional transit authority.)

⁸ <http://www.fta.dot.gov/documents/chap53MAP21.pdf>, (p.7)

⁹ Notice of FTA Transit Program Changes, Authorized Funding Levels and Implementation of the Moving Ahead for Progress in the 21st Century Act (MAP-21) and FTA Fiscal Year 2013 Apportionments, Allocations, Program Information and Interim Guidance (p. 33). Federal Transit Administration, accessed at http://www.fta.dot.gov/documents/2012-10-10_MAP-21_FINAL.pdf

According to interim guidance from FTA on MAP-21, the MPO will still have a role in some of the project selection process for JARC activities under the Urbanized Area Formula Grants (Section 5307). Specifically, FTA states that "In order to receive funding for a job access and reverse commute project under this provision, the project must be identified by the MPO and Designated Recipient as a job access and reverse commute project in the Designated Recipient's annual Program of Projects, which must be developed in consultation with interested parties, published with the opportunity for comments, and subject to a public hearing."¹⁰ Furthermore, the FTA encourages "MPOs and Section 5307 Designated Recipients to continue the coordinated planning process in identifying projects for funding", including "identifying the needs of existing job access and reverse commute projects and services."¹¹ As noted earlier, the DCHC MPO is the Designated Recipient of the funds. Therefore, the MPO, as the defined "Designated Recipient" of the funds, must work with the direct recipients to develop the Program of Projects that identifies JARC activities.

Section 5310 (Enhanced Mobility of Seniors and Individuals with Disabilities) - For Section 5310 funds, the MPO may be the recipient of the grant, who will then determine the activities to be funded under this program. The FTA guidance states "in urbanized areas over 200,000 in population, the recipient charged with administering the section 5310 Program must be officially designated through a process consistent with sections 5303 and 5304 prior to grant award. The MPO, State, or another public agency may be a preferred choice based on local circumstances. The designation of a recipient shall be made by the governor in consultation with responsible local officials and publicly owned operators of public transportation, as required in sections 5303 and 5304."¹² Therefore, the DCHC MPO could be the identified recipient of the funds.

¹⁰ Ibid, p. 36.

¹¹ Ibid, p. 37

¹² Ibid, p. 42

Moreover, the FTA requires that any projects selected for Section 5310 funding be "included in" or "derived from" a locally developed, coordinated human service transportation plan and that the recipient develop and submit a Program or Projects when submitting their application.¹³ Finally, the FTA guidance notes that recipients may develop a competitive selection to select projects, but that this process is not required.¹⁴ The allocation of funds must be fair and equitable, and the recipient must allocate at least 55% of the apportionment for projects planned, designed, and carried out to meet the special needs of seniors and individuals with disabilities when public transportation is insufficient, inappropriate, or unavailable.

Pending Federal Guidance - From research of the changes to transit programs under MAP-21, there appears to be uncertainty in several states on the specific role of MPOs in either selecting projects or in administering these two transit programs, particularly of MPOs that were the recipients of the (now eliminated) New Freedom and JARC programs. FTA has indicated that new guidance for both the Urbanized Area Formula Grants programs (Section 5307) and the Enhanced Mobility of Seniors and Individuals with Disabilities program (Section 5310) will be released to reflect changes under MAP-21.

4.3 Other FTA Grant Programs

Other grant programs that could help the systems or agencies meet the transportation needs of older adults, the disabled and individuals and families with low income in DCHC MPO area are described below.

Rural Area Formula Grants (Section 5311) - This program provides capital, planning and operating assistance to support public transportation in rural areas, defined as areas with fewer than 50,000 residents. Eligible activities include those previously eligible under the JARC program. The federal share is 80% for capital assistance and 50% for operating assistance, and 80% for ADA non-fixed-route paratransit service, using up to 10% of a recipient's apportionment. Transit providers whose service area extends beyond the defined urbanized area may apply for these funds, in proportion to their service areas.

¹³ Ibid, pp. 44-45

¹⁴ Ibid, p. 45

Research, Development, Demonstration and Deployment (Section 5312) - This program supports research activities that "improve the safety, reliability, efficiency and sustainability of public transportation" through new technologies, materials and processes. The eligible activities can include research on items such as performance management, safety, and data and communication systems; testing and evaluating technologies, materials and processes; and early deployment and demonstration of innovations that have applicability to the transit industry. These activities can include acquiring or leasing low- or no-emission vehicles. Mobility management and providing more efficient and effective transit services to older adults, individuals with disabilities and low-income individuals are listed as eligible research activities. The federal share is 80% for all activities.

Technical Assistance and Standards (Section 5314) -This program provides funds for a variety of technical assistance activities, as well as for development of voluntary standards and best practices. MAP-21 specifically states that these activities can include efforts to assist with human services transportation, meeting the needs of older individuals, and addressing transportation equity for low-income individuals. The federal share is 80% for all activities.

Bus and Bus Facilities Program (Section 5339) - This capital program provides funds to replace, rehabilitate and purchase vehicles and related equipment and to construct transit vehicle facilities. Eligible recipients are those operating fixed route bus service or who allocate funds to fixed route bus operators. The federal share is 80% for all activities.

It should be noted that since MAP-21 has only been in force for approximately one year, there is little information on how recipients are using these grant programs under MAP-21 to meet the needs of transportation disadvantaged populations.

5. Inventory of Current Human Services Transportation and Public Transportation

An early step in the 2013 Plan Update process was to revise the inventory of the available public and private transportation options for the target populations listed in the 2007 Plan. The information provided below is for the publicly funded and operated transportation providers. In addition to these organizations, there are a variety of private taxi operators (with and without lift-equipped vehicles) and non-profit organization that provide transportation as one of several services to elderly or disabled individuals.

5.1 Community Transportation Providers

Durham County ACCESS, Orange Public Transportation (OPT), and Chatham Transit Network are the community transportation providers in this three-county area.

Durham County ACCESS (DCA)

DCA is the principal county-wide human service transportation service provider in Durham County. DCA primarily serves the clients of Durham County community service agencies but also serves rural general public needs throughout Durham County. It provides curb-to-curb, demand response shared ride services. Its primary service is for residents who are age 60 or over, have a disability, live outside the City of Durham, or need transportation for work-related purposes and have no other form of transportation. DCA provides contract service for other human service agencies, including non-emergency Medicaid transportation through the Durham County Department of Social Services. The DCA services are coordinated by the Community Transportation Program at Durham County Cooperative Extension. DCA connects with Durham Area Transit Authority (DATA) bus service.

Contact – Meg Scully, Transportation Program Manager, Durham County ACCESS, 919.560-8757

Service Area – Durham County, urbanized and rural areas

Service Type – Subscription and demand response

Customers – Contract agency clients and general public (rural only)

Hours of Service – Monday - Saturday, 5:30am -midnight, Sunday 7:00am – 7:00pm

Price/Fares – Individual rural general public trips: \$2.00 each way.

Publicity/Marketing – ACCESS conducts passenger surveys, agency surveys and has developed a rider's guide. Marketing and outreach efforts are conducted by the contract agencies that DCA serves, as the agency clients are the main beneficiaries of the service. DCA also operates a website.

Orange County Public Transportation (OPT)

The OPT program, a division of the Orange County Department on Aging, is a county agency that provides both fixed-route and demand response service within Orange County. Services include demand response shared ride, as well as a circulator service within Hillsborough. OPT also operates a fixed route service between Hillsborough and Chapel Hill (jointly operated and funded by OPT, Chapel Hill Transit and Triangle Transit). The Orange County Transportation Advisory Board (TAB) comprised of human service agencies and transportation system representatives. The TAB advises OPT on its operations and recommends policy to the Board of Commissioners. Transit services provided by OPT connect with Chapel Hill Transit and Triangle Transit.

Contacts - Al Terry, Orange Public Transportation Supervisor, 919.245.2002

Service Type -Fixed route, deviated fixed route, demand response and subscription routes

Hours of Service – Monday - Friday, 6:00am - 7:00pm and Saturday, 8:00am - 5:00 pm

Service Area - Demand response trips can be within Orange County excluding Chapel Hill/Carrboro (trips must start outside of these jurisdictions but can end anywhere in Orange County). Fixed-route services are within Hillsborough and between Hillsborough and Chapel Hill.

Customers - Clients of contract agencies and Orange County residents

Price/Fares - vary depending upon the route and service provided. The fixed public route is \$2.00 per trip (\$1.00 if elderly or disabled). Fixed route circulator service within the town of Hillsborough is fare free. Department of Social Services medical trips are charged back to the department (the client does not pay). General public fares (demand response) are \$12.75 per trip. Senior center trips are cost sharing only. Contract agency subscription cost is \$19.00 per hour and/or \$.45 per mile.

Publicity/Marketing - Public forums, newspaper, website, logos on vehicles, brochures

Chatham Transit Network (CTN)

Chatham Transit Network (CTN) is the countywide transportation provider for Chatham County (rural and urban). CTN is not a governmental agency, but is a 501(c)(3) private non-profit consolidated transportation system that is governed by a Transportation Advisory Board. It offers fixed-route services, as well as subscription route and demand response transportation by contractual agreement with human service organizations. CTN operates a demand response service called In-County Service, and two fixed routes – (Pittsboro to Chapel Hill, and Pittsboro to Siler City). Project Health Rides provides medical transportation within the county and is also operated by CTN.

Contact – Dan Stroupe, CTN Executive Director, 919.542.5136

Service Area – Chatham County, plus portions of Orange County for fixed route services.

Service Type – Fixed-route, subscription route and demand response service.

Customers – Contract agency clients and general public. The general public transportation service is primarily provided for the elderly, disabled, transportation disadvantaged and economically disadvantaged riders. Fixed route services are open to the general public.

Hours of Service – The office is open from 8:00 am and 5:00 pm each weekday. Currently, CTN operates demand response services from 8:00 am to 5:00 pm weekdays. Fixed-route service hours vary, but generally operate from approximately 7:00 am to 6:00 pm.

Fare/Prices – General public fares vary per mile. Health Rides trips are paid through a voucher program with local agencies and non-profits. Fixed route services have a fare of \$3.00 one-way.

Publicity/Marketing -CTN distributes and stock brochures at various human service agencies. Additionally ads are placed in local newspapers and CTN participates in community events. CTN also operates its own webpage.

5.2 Urban Paratransit Providers

DATA ACCESS, Chapel Hill EZ Rider, and T-Linx provide demand-response services to persons with disabilities who meet local eligibility criteria.

Durham Area Transit Authority (DATA)-ACCESS

DATA ACCESS is the name of the Americans with Disabilities Act (ADA) paratransit service for the City of Durham, and is sponsored by the Durham Area Transit Authority (DATA). Only riders who meet the criteria specified by the ADA and who have been certified as eligible can use DATA ACCESS. DATA ACCESS operates curb-to-curb service to all locations within the City of Durham and to any location outside the City that is three-quarters of a mile from any fixed-route service operated by DATA. The DATA ACCESS taxicab program provides ACCESS customers greater freedom and mobility. This program offers ACCESS customers the option of using taxicab service for their transportation needs via a discounted taxicab coupon book.

Contact– Tara Caldwell, First Transit, General Manager, 919.560.1555, ext. 36306

Service Area– Durham City, plus Chapel Hill for Medical trips

Service Type –Curb-to-curb trips for any purpose

Customers – 60 percent of clients are certified ADA clients and the others are certified through Health and Human Service Programs or General Public (rural

only).

Hours of operation –Monday-Saturday, 5:00 am – 12:30am, Sunday 7:00am – 8:00pm

Fares/Price –\$2.00 per one-way general public trip; booklets of tickets may be purchased at a reduced cost of\$1.70 per trip. Costs to agencies are based on revenue hours.

Publicity/Marketing – Clients find out about ACCESS through clinics, social services or other partnering agencies, and through the DATA ACCESS website.

Chapel Hill Transit/EZ Rider

Offered in connection with Chapel Hill Transit (CHT), EZ Rider is a complementary paratransit (ADA) service which uses lift equipped vehicles to transport individuals with physical and cognitive disabilities that prevent them from using Chapel Hill Transit’s regular bus service. Passengers must be certified through the application process. EZ Rider also operates the Senior Shuttle, a free service that provides transportation for Chapel Hill/Carrboro seniors. The shuttle has a set weekly schedule that includes local grocery stores, shopping centers and the Seymour Center.

Contacts – Tyffany Neal, Demand Response (EZ Rider) Operations Manager, 919.969.4949

Service Area – within 3/4 of a mile from the nearest fixed-route services provided by CHT (also operates in Carrboro).

Service Type –Trips for eligible individuals with disabilities. The Senior Shuttle is a circulator service available for seniors.

Customers – ADA-eligible individuals that are certified due to a physical or cognitive disability that prevents them from using the fixed-route service. The Senior Shuttle is available for seniors.

Hours of operation – Varies, same as Chapel Hill Transit fixed-route services. The Senior Shuttle operates 8 AM to 5 PM on weekdays.

Fares/Price –Free

Publicity/Marketing – Chapel Hill Transit distributes a EZ Rider brochure that highlights the eligibility process, service parameters and scheduling. Additionally, public forums, newspapers and the Chapel Hill Transit website promote awareness of this demand-response transit service.

Triangle Transit - T-Linx

The Triangle Transit's paratransit system operates in accordance with ADA and is designed to serve individuals with disabilities that prevent them from using Triangle Transit's fixed route services.

Contact – Vinson Hines, Jr., Transit Manager, 919.485.7460

Service Area – Trips must begin and end within ¼ mile from fixed route Triangle Transit bus service on Raleigh, Durham, and Chapel Hill routes.

Service Type - Trips for certified passengers for transportation regardless of trip purpose. Service is curb-to-curb with a door-to-door option.

Customers – ADA-certified clients that are unable to use the fixed-route system due to a disability or health condition.

Hours of operation- Monday – Friday, 5:50 am - 11:15 pm, Saturday 6:40 am - 7:20 pm

Fares/Price – \$4.00 one-way

Publicity/Marketing - T-Linx distributes a paratransit services brochure that highlights the eligibility and application process. Additionally, public forums, newspapers, flyers, and the GoTriangle website promote awareness of the T-Linx accessible transit services.

5.3 Fixed-Route Urban Public Transportation Providers

Chapel Hill Transit and DATA provide local fixed-route bus service within their jurisdictions. Triangle Transit provides regional bus services between the communities in the DCHC MPO region and to other jurisdictions in Wake County.

Chapel Hill Transit

Chapel Hill Transit operates public transportation services within the Towns of Chapel Hill and Carrboro and on the campus of the University of North Carolina. The services are fare free and are funded primarily by the Town of Chapel Hill, Town of Carrboro, the University of North Carolina, and state and federal grants. The two towns and the university share annual operating and capital costs associated with Chapel Hill transit on a contractual basis. The types of services operated include fixed route bus service, Tar Heel Express bus service for special events (requires fare), and EZ Rider (described above) service (for mobility impaired).

Contact – Brian Litchfield, Director, 919.969.4900

Service Area – Town of Chapel Hill and Town of Carrboro. Additional services are provided jointly with Triangle Transit for services to Hillsborough and with CTN for services to Pittsboro.

Service Type – Fixed route

Customers – General public; majority of riders are affiliated with UNC and UNC Hospital

Hours of Service – Chapel Hill Transit adjusts service levels at various times throughout the year to meet service demands. However, general service hours are Monday-Friday, 5:00 am - 1:15 am, Saturday 8:00 am - 6:30 pm, Sunday 10:30 am - 11:30 pm

Price/Fares – Free

Publicity/Marketing -- Town of Chapel Hill website and GoTriangle website. These websites include real-time bus information, as do electronic signage at select bus stops in the Chapel Hill Transit service area.

Durham Area Transit Authority

The City of Durham assumed the operation of the local bus system in 1991, from Duke Power, naming it Durham Area Transit Authority (DATA). On October 1, 2010, Triangle Transit assumed responsibility of planning and marketing activities for DATA on behalf of the City of Durham. By contract, Triangle Transit oversees the city's fixed route bus service and paratransit service (DATA ACCESS), and is responsible for providing service planning and marketing functions.

Contact – Sean Smith, General Manager, 919.560.1545 Ext. 36123

Service Area – City of Durham and urbanized areas of Durham County

Service Type – Fixed Route

Customers – General public

Hours of Service – Monday - Saturday 5:30 am - 12:30 am, Sunday 6:30 am - 7:30 pm

Price/Fares – Individual: \$1.00 per trip.

Publicity/Marketing – GoTriangle website

Triangle Transit

Triangle Transit was created to plan, finance, organize, and operate a public transportation system for the Triangle area, which includes Orange, Durham and Wake Counties.. Triangle Transit serves the general public with fixed route and express bus services as well as with ride sharing services. Paratransit services provided by Triangle Transit is called T-Linx.

Contact – Jimmy Price, Interim Director of Bus Operations, 919.485.7492

Service Area – Urbanized areas of Durham, Orange and Wake Counties

Service Type – Fixed route bus, vanpool, carpool matching

Customers – General public, primarily Triangle area commuters

Hours of Service – Monday – Friday 6:00 am – 11:10 pm, and Saturday 6:30 am – 7:00 pm

Price/Fares – Individual: \$2.00 per trip for regional bus service, \$2.50 per trip for express bus service; vanpool fares are subscription based and determined by trip length and number of van riders.

Publicity/Marketing – GoTriangle website

6. Needs Assessment

To assess the transportation needs for the targeted populations in the MPO region, this plan utilized available demographic data, reviewed the findings from the 2007 Plan, analyzed changes since 2007, reviewed other available data and plans, and engaged stakeholders via a survey and workshop.

6.1 Existing Demographics of the DCHC MPO Region

Three target populations are particularly relevant to this 2013 Plan Update:

- Seniors (ages 65 and older)
- Low-Income Households
- Persons with Disabilities

Existing conditions for these target populations were determined using the 2011 American Community Survey (ACS) from the US Census Bureau, with 2000 Census data used to identify any significant changes to these populations in recent years.

Seniors

Table 6-1 summarizes existing senior populations for 2011 and 2000. It shows total numbers and percentages of seniors.

Table 6-1. DCHC MPO Seniors Population

	Total Population in DCHC	65+ Population	% Seniors	Total Population in DCHC	65+ Population	% Seniors
	2011			2000		
Chatham County	19,764	5,046	25.5%	13,077	2,577	19.7%
Durham County	263,862	25,609	9.7%	223,314	21,546	9.6%
Orange County	128,444	12,044	9.4%	106,055	8,565	8.1%
DCHC Total	412,070	42,699	10.4%	342,446	32,688	9.5%

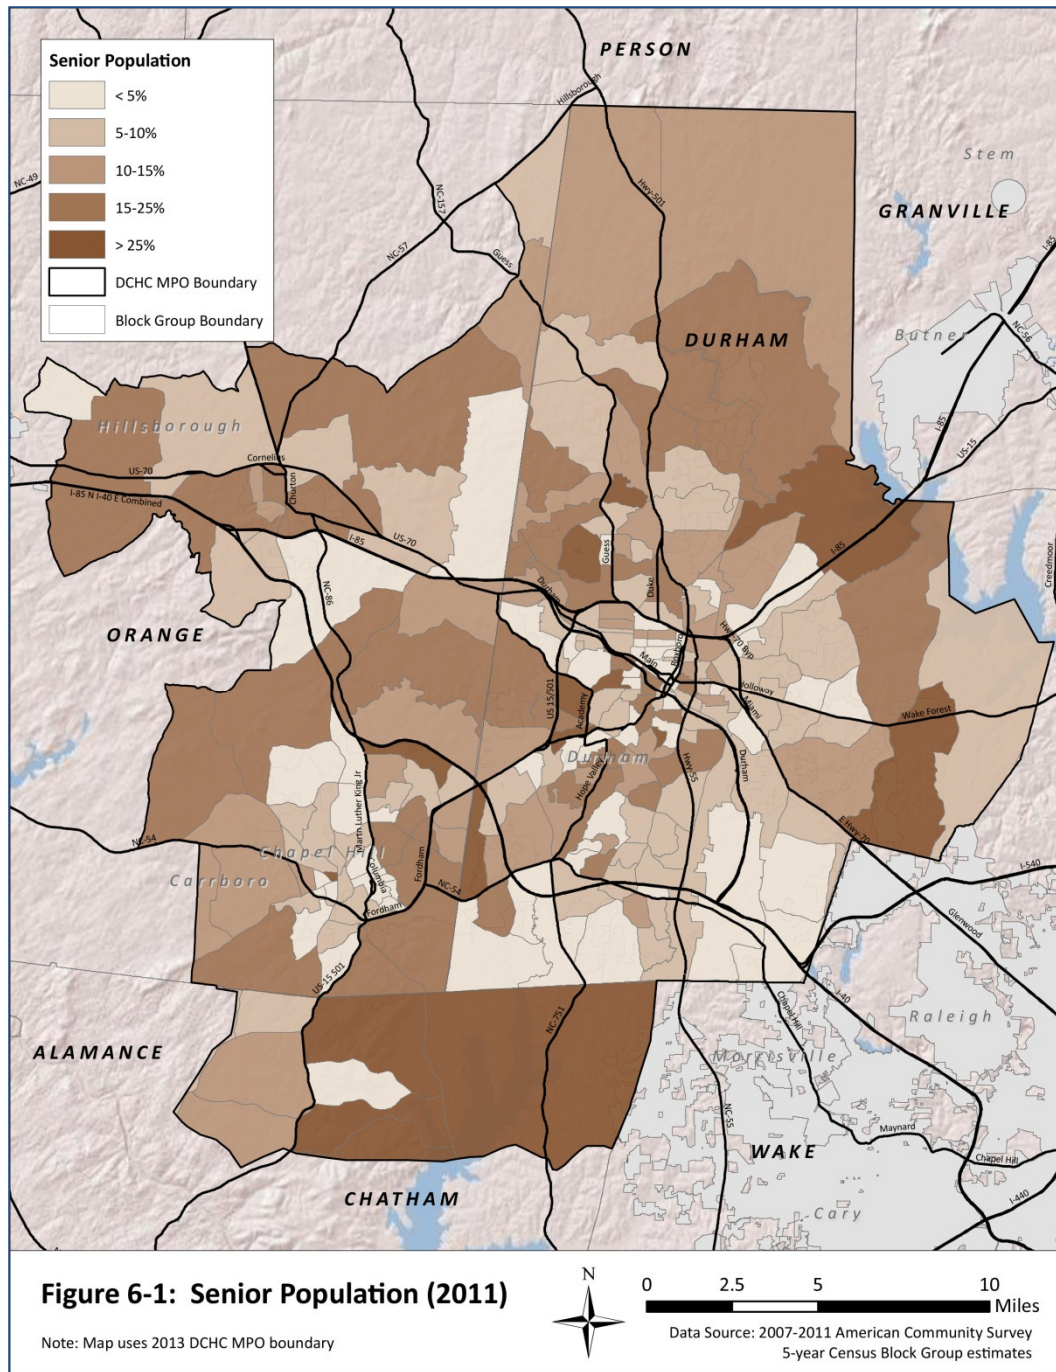

Source:

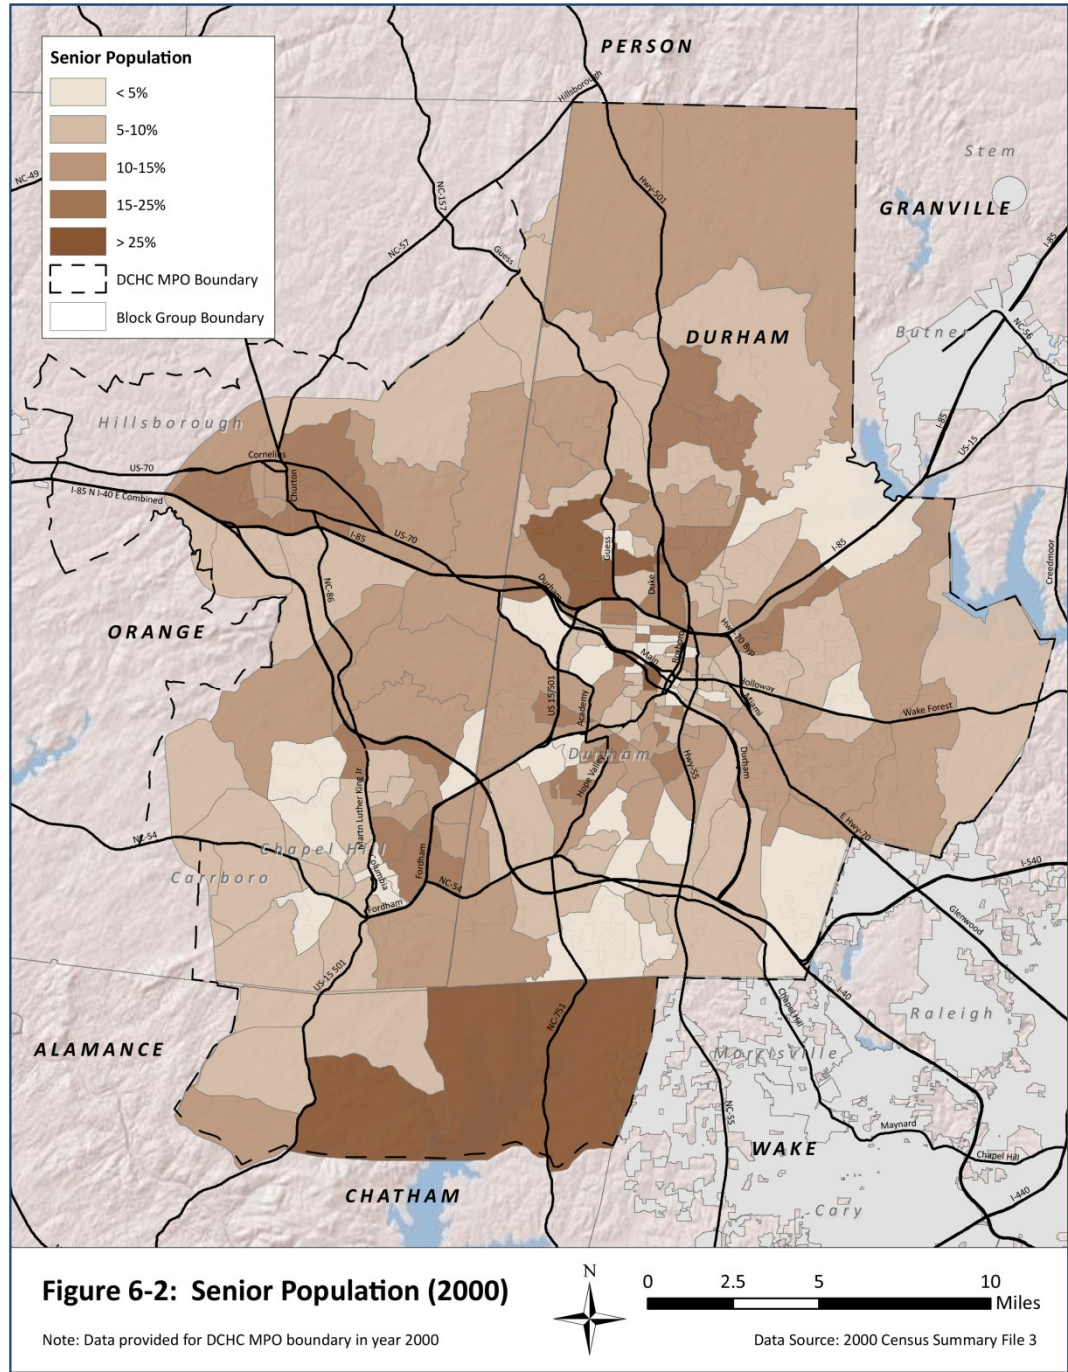

American Community Survey 2007-2011 5-year estimates, Table: B01001 - Sex By Age
2000 Decennial Census, Table P8 - Sex By Age

As seen in the table, the highest proportion of senior populations in the DCHC area is in Chatham County, where more than one-quarter of the population is above 65. This is likely driven by the Governor's Club and Farrington Village developments. Both the Durham and Orange County portions of DCHC have a senior population that is approaching 10 percent of their total population. Overall, 10.4 percent of DCHC residents are 65 and older.

Spatial distribution by block group is shown in Figure 6-1. The senior population is generally distributed evenly throughout the region, with small pockets of large senior populations more likely to be found in the rural and suburban areas of the MPO than in the more urban centers. While Chatham County has block groups with very high senior populations, southeast Durham County has a marked lack of seniors relative to the region. The lack of seniors in this area can be attributed to RTP, which has limited residential development within its boundary and adjacent areas.

The senior population overall and the percent of the population 65 and older is higher than it was in 2000, with gains in Orange and Chatham Counties. Durham County's percent of senior population is unchanged. The spatial distribution is generally unchanged, however, as shown in Figure 6-2. This suggests that there has been some clustering of senior population in the DCHC region over the last decade, which could make it easier to facilitate coordinated transit provision for this target population.

Low-Income Households

Poverty rates can be measured several different ways, but a recent study of ACS data found significant changes to poverty rates when off-campus students are included¹⁵. Given the presence of several major colleges and universities in the MPO, low-income populations have been measured using poverty status of families with children under the age of 18. While this does not capture the total number of low-income persons, it does ensure that poverty numbers are not artificially inflated, and provides a good barometer of the spatial distribution of low-income areas.

Table 6-2. Low-Income Households

	Total Families	Families in Poverty	% Poverty	Total Families	Families in Poverty	% Poverty
	2011			2000		
Chatham County	5,956	235	3.9%	3,808	179	4.7%
Durham County	63,781	7,426	11.6%	54,608	5,351	9.8%
Orange County	30,085	2,800	9.3%	26,417	1,625	6.2%
DCHC Total	99,822	10,461	10.5%	81,350	6,969	8.6%

American Community Survey 2007-2011 5-year estimates, Table: B17010 - Poverty Status In The Past 12 Months Of Families By Family Type By Presence Of Related Children Under 18 Years By Age Of Related Children
2000 Decennial Census, Table P90 - Poverty Status In The Past 12 Months Of Families By Family Type By Presence Of Related Children Under 18 Years By Age Of Related Children

¹⁵ <http://www.census.gov/hhes/www/poverty/publications/bishaw.pdf?eml=gd>

Poverty rates, while similar to seniors in aggregate, are found with much higher prevalence in Durham and Orange Counties than in the portion of Chatham County within the MPO. The portions of Chatham County within the MPO has very low poverty rates, below 4 percent, while the portions of Orange County have rates approaching 10 percent and Durham County has rates over 10 percent. When looking at individual block groups, clusters of high poverty rates (25% and above) are found in Downtown Durham and its surroundings, as well as along the US-70 corridor between Durham and Hillsborough. (See Figure 6-3 for poverty rates by Census block group, and Table A-1 in Appendix for detailed data).

Unlike senior populations, low-income populations have both increased and spread out since 2000, increasing the difficulty of providing transit options for this group. While Chatham County poverty rates have fallen, Durham and Orange County have seen several thousand new families in poverty, with major increases in East Durham, North Durham, Carrboro, Chapel Hill, and along the I-85 and US-70 corridors. Some of that increase is along major transportation routes, but not all (see Figure 6-4).

Individuals with Disabilities

Recent data on the third target population, persons with disabilities, can currently be explored only at the county and citywide level, as new definitions of disability were defined in 2008. Note that census block-level data will be released in December 2013, and it is recommended that the findings discussed here be re-examined after the release of this information. The current findings are showing in Table 6-3 below.

Table 6-3. Disabled Population, 2011

	Total Population	With Disability	Percent With Disability
Counties			
Chatham County	62,955	7,198	11.4%
Durham County	263,257	28,394	10.8%
Orange County	133,120	11,180	8.4%
Cities			
Chapel Hill	56,403	3,588	6.4%
Durham	227,172	24,667	10.9%

Source: American Community Survey 2009-2011 3-year estimates

Table: B18101 - Sex By Age By Disability Status

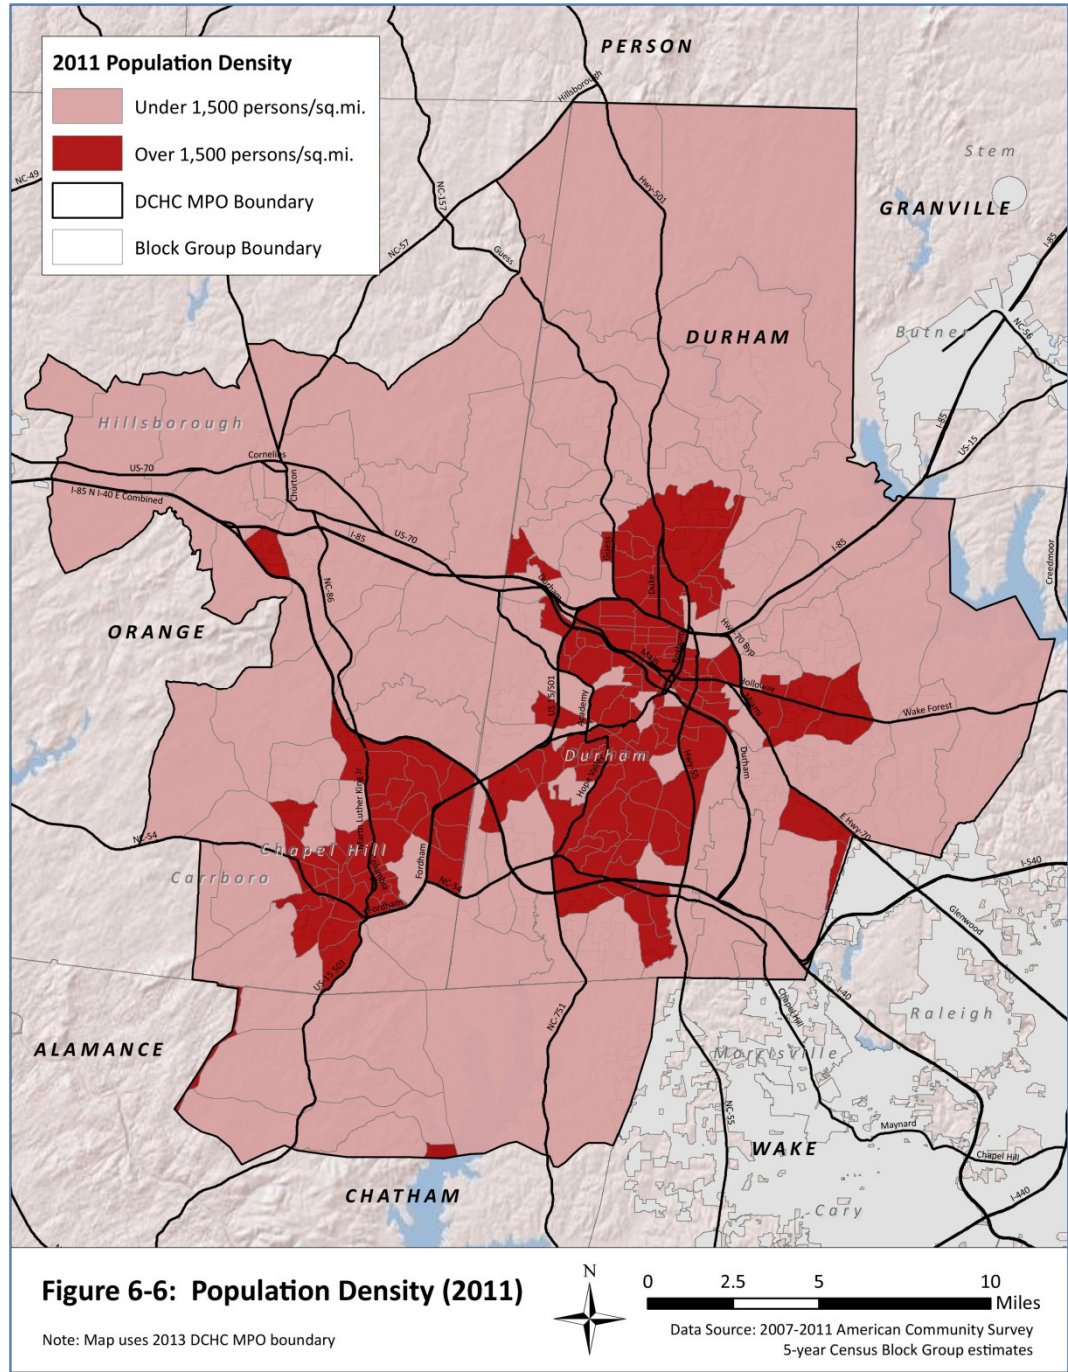

Disability status is fairly similar across the three counties and the City of Durham, though Chapel Hill has a smaller percent of population with a disability than the rest of the region. Spatial distribution is shown in Figure 6-5, but this should be revisited once block group data is available.

Data for the year 2000 data is not displayed, because the definition of disability has changed since the 2000 Census. The 2011 ACS does not recommend the disability data be compared to 2000 Census data due to the significant differences in this definition of disability.

Population Density

An initial analysis of the demographic data illustrates some interesting developments for the MPO region. Figure 6-6 shows those areas within the MPO region that have population densities at 1,500 persons per square mile or greater, which is the density that many transit operators and planners consider the minimum for viable fixed-route transit service. Most of the census tracts at these densities are within the city limits of Durham, Chapel Hill, and Carrboro, with additional areas in Hillsborough and northern Chatham County. These are also the areas that have fixed-route bus services provided by Chapel Hill Transit, DATA, Triangle Transit, CTN, and OPT. However, over 80% of the MPO region's land cover is below the minimum density threshold. Approximately 40% of the MPO population resides within the lower-density areas not typically served by fixed-route transit.

6.2 Needs Assessment from 2007 Plan

A review of the 2007 Plan was completed to determine which of the needs are still relevant in 2013, and which plan recommendations might be appropriate today. The following were identified in 2007 Plan as the seven top priorities to be used when evaluating activities to be funded by JARC and New Freedom grants:

- Mobility managers helping customers identify transportation options to meet their needs
- Intra-county and cross-county services connecting rural areas to urban areas
- A unified regional paratransit application and eligibility determination and certification process needs to be created that it is streamlined, clarified, and consistent across agencies
- Evening service (6pm – 10pm) and late night service (10pm – midnight)
- Universal fare card that works on all services
- Better on-time performance for fixed-route and paratransit services
- Travel training

Many of the activities funded by the MPO's competitive process for the JARC and New Freedom programs have attempted to address these seven priorities identified in the 2007 Plan. A sample of these activities is shown in Table 6-4.

Table 6-4. Select JARC and New Freedom Funded Activities in DCHC MPO Region

2007 Plan Priority	Funded Activity*	Funds Recipients
Mobility Management	GoTriangle regional transit information partnership	Chapel Hill Transit, DATA
Evening & late night service	NS and G bus routes (night service)	Chapel Hill Transit
Better paratransit services	Client Service Improvement	DATA ACCESS
Mobility Management/Travel Training	Mobility Manager Positions	Chapel Hill Transit, Durham County
Travel Training	Travel Training Activities	Durham Center for Senior Life
Intra-county & cross-county services/Better on-time performance	Extension of HS bus route & mid-day service	Chapel Hill Transit
Evening & late night service	Year-round night service (various bus routes)	Chapel Hill Transit
Mobility Management/Travel Training	EZ Rider Senior Shuttle (circulator)	Chapel Hill Transit
Evening & late night service	Extension of evening service, expansion of routes, and increased in bus frequency	DATA
Better paratransit services/Intra-county & Cross-county services	Access Taxicab Supplemental Service	DATA
Unified regional paratransit application process	Paratransit Eligibility Assessment	DATA, Chapel Hill Transit, Triangle Transit
Better paratransit services/Intra-county & Cross-county services	Job Access Transportation Program	Durham County
Better paratransit services/Intra-county & Cross-county services	Work Wheels Work (paratransit for job training/employment)	Susie Taxi

*Projects selected and funded between 2007-2013. The 2013 JARC/New Freedom projects have not been funded yet and are not included in this list.

6.3 Workshop

As part of the 2013 Plan Update process, a workshop was held on September 13, 2013 to help assess transportation needs and develop possible strategies to address the needs. Approximately 180 individuals representing businesses, non-profits, advocacy groups and government were invited to participate at the workshop. Thirty-four participated, plus three staff members from Gannett Fleming (consultant) and two DCHC MPO staff members to help facilitate the workshop. Organizations represented at the workshop are listed to the right.

During the workshop, the participants were divided into four groups to discuss and identify changes in human service transportation since the 2007 Plan, and the needs for the targeted populations (older adults, individuals with disabilities, households with low-incomes). The results of the four group's efforts were collected on flip charts and reported out.

During this exercise participants were asked to write down changes that have occurred in the region since the 2007 plan:

- Services have not kept up with increased ridership
 - Funding has stagnated—need more money for projects
 - Bull City Connector is a great idea implemented through collaboration
 - Partnerships—e.g., Duke University
 - Fixed route transit card for riders that are multimodal
-
- Increased use of hybrid buses (currently less funding for operational costs)
 - Improved transparency in transit planning

Workshop Participants

- Chapel Hill Transit
- Chatham Transit Network
- DATA
- DCHC MPO
- Division of Services for the Blind (NCDHHS)
- Duke Medicine
- City of Durham
- Durham Center for Senior Life
- Durham County Access
- Durham County Department of Public Health
- Durham County Transit Advisory Board
- Durham Health Innovations/Duke Division of Community Health
- Durham Housing Authority
- Durham Orange County Friends of Transit
- Durham Passenger Vehicle for Hire
- Durham's Best Cab
- Gannett Fleming
- OE Enterprises, Inc.
- Orange County Department of Aging
- Orange County Planning Department
- Orange County Voice
- Senior Volunteer Program of Durham County
- Seniors on the Go
- Triangle Area Rural Planning Organization/
Triangle J COG
- Triangle Transit
- UNC-Chapel Hill Dept. of City and Regional
Planning

- More cooperation across jurisdictions
- Employers seem to support a more comprehensive transportation system
- Emergency ride home programs (more promotion of program and an increase of similar programs needed)
- Successful voucher programs (are there any)
- Growth in senior population, driving increased need for door-to-door service (as opposed to curb-to-curb)
- Senior growth more pronounced in rural areas

Listed below is a summary of the needs developed by all four groups.

1. Services for Seniors: The region needs to improve access to transit for seniors, including more demand response services and having easier and safer access to fixed route bus services.
2. Need for Cooperation with Area Universities and Colleges: There is a need for more fare free or discounted fares for college students and university/college employees, including university hospitals.
3. Education and Outreach: Better education and outreach to groups about available services is needed, including outreach to groups who have a limited understanding of English.
4. Travel Training: New users need more travel training, including travel training on connecting between various transit systems in the area.
5. Fare Free Services in Durham: Durham County employees need information on how to use the Bull City Connector (fare free shuttle around downtown Durham) and there is a need to extend Bull City Connector to Durham Technical Community College and North Carolina Central University.
6. Rural Services and Rural-Urban Connections: The region needs greater frequency of service to rural areas, and better rural urban connections. More point-to-point fixed route service is needed, with fewer transfers to downtown.
7. Better Coordination and Connection Among Systems: There needs to be better coordination among the service providers, and better connections between transit services, including better connections between local and regional bus services. Some transit operations should be consolidated. There should also be more coordination between the social health agencies and transit providers.

8. **Better Amenities at Transit Stops:** There should be better amenities at transit stops, including items such as maps, shelters, information on bus arrival, and variable message signs (next bus electronic signs). There should also be greater safety at stops such as sidewalk connections and better lighting.
9. **Funding:** There is a need for more capital funding to purchase vehicles, and funding is needed to keep new services running for more than a couple of years to build ridership.
10. **Accommodation for Families:** Buses should have more accommodations for strollers and children.
11. **Extended Service:** The region needs more evening services, and more services when the University is on break (specifically in Chapel Hill).
12. **More Services for Non Work Trips:** There is a need for more services for medical trips, and for social engagement trips.
13. **Land Use and Housing:** The region will need more affordable housing around transit stops, and housing for the transit needy. There is also a recent trend of medical facilities and employment to relocate in areas not served by fixed route transit.

The participants were then provided 4 yellow dots to vote and indicate what they considered the greatest needs, and one red dot to vote on what they considered the top need for the region. The voting results are listed below.

Need	All Votes	Top Need
1. Better amenities at transit stops	34	8
2. Education and outreach	25	5
3. Better coordination and connection among systems	18	3
4. Land use and housing	13	3
5. Travel training	12	4
6. Services for seniors	9	3
7. Rural services and rural-urban connections	9	0
8. Need for coordination with area universities and colleges	6	4
9. Fare free services in Durham	5	1
10. Funding	4	2
11. Extended services	2	0
12. More services for non-work trips	2	0
13. Accommodations for families	0	0

The four breakout groups were then each assigned two of the needs that received the most votes and then asked to develop ideas for possible solutions. It should be noted that the needs education and outreach and travel training were combined. Moreover, although the need land use and affordable housing received several votes, these changes were deemed to be outside of the scope of this plan, and were not evaluated. A summary of the possible solutions is provided below.

1. *Better Amenities at Transit Stops*

- Improve capital funding opportunities
- Seek sponsorship by businesses and others of stop improvements
- Develop a menu of improvements for transit stops, from lowest to highest that can be eligible for funding, including:
 - Pavement/road/crosswalks
 - Shelter/bench/trashcan
 - Routes/schedule signs
 - Bike racks
 - Arrival display
 - Rental bikes at terminal/downtown stops

2. *Improve Funding Opportunities for Transit*

- Have private foundation grant funding for transit stop improvements
- Develop a toolkit for private sponsorship
- Improve solicitation support (including asking private businesses or non-profits help fund the local match for federal money/formula grants)
- Increase parking at bus terminals
- Reinstigate North Carolina's travel demand funding requirement for employers with more than 100 employees

3. *Services for Seniors*

- Continued and new funding for a Mobility Manager position in each county
- Improved shelters and walkways, as well as audio/visual technologies, and multilingual messages
- Improving visibility and information at stops
- For cross-county medical appointments, coordinate routes and times among providers
- Coordination of separate bus systems with schedules and cross-territory buses

- More time for crosswalks at or near transit stops
- Enhance visibility of transit stops

4. *Education and Outreach, including Travel Training*

- Survey non-riders to see why they do not use transit
- Travel training should include
 - Transit providers
 - Social service agencies
 - Non-English speaker outreach
- Outreach materials
 - Adjust reading levels to a less "academic" syntax
 - More iconography and simplified information
 - Several languages (and not academic language, more colloquial/spoken)
 - Visually descriptive, more landmarks
- Gotriangle.org—Use more landmarks to identify time points and include a bus app for smart phone
- Service changes—More wayfinding/signage when there are changes
- Better on-board "next stop" alerts (visual and verbal)
- Bilingual outreach that includes:
 - Customer service representatives
 - Drivers
 - Mobility managers
- Better training for the regional call center service representatives on all available services (including rural and human service transit options)
- More communication/coordination with communities, human service agencies (get all stakeholders engaged)

5. *Better Coordination and Connections Among Systems*

- One call center/website with information -- get information about existing website/call center and make it apply to demand response service as well
- Direct route from Hillsborough to Durham
- Coordinate with intercity bus services (e.g. Greyhound) and rail (Amtrak)
- Improved access to RDU airport
- On-site staff to help riders at major stop/transfer locations

- Interactive data available on-board the bus (possibly via some device connected to Gotriangle.org site)
 - Need better information on other systems available at stations (e.g. Downtown Durham transit center should have information on TTA, CHT, etc.—Not just DATA)
 - Need information onboard buses to let people know when they reach their transfer location (e.g. recorded message)
 - Need more surveys/feedback from the riders (2-way communication)
 - Expansion of a transit ambassador program
 - Information kiosks at major locations (hospitals, senior centers, high schools, RDU, Amtrak, etc.)
 - Smart phone app
 - Provide information to newcomers on available services (dispersed by universities during orientation, by realtors, rental agents, etc.)
6. *Need for Cooperating with Universities and Colleges*
- Increase University/Hospital contributions to transit
 - Capital improvements/structures servicing
 - Funding for routes to service them
 - Educating businesses and medical service facilities of impact of moving to areas not served by transit
 - Community College—possible student fees to improve services to campuses
 - Student discount (reduced passes for college/university students)
7. *Rural Services and Rural-Urban Connections*
- Coordinating committee for all providers
 - Compatible technology (e.g., monitoring systems) that allow coordination in route planning
 - Overarching transit management agency to help/force cooperation between local/municipal agencies

6.4 Transit Survey

As part of the CPT-HSTP update, a survey was submitted to transit providers, human services agencies, and non-profits in the MPO region. The survey was emailed to the workshop invitees, and hardcopies were also provided to the workshop participants. Below are the findings from the survey.

An online and paper survey was administrated to gauge the thoughts of, and solicit ideas from, stakeholders within the region. A total of 36 respondents provided their experiences and thoughts on coordinated transit issues. The analysis below shows this data.

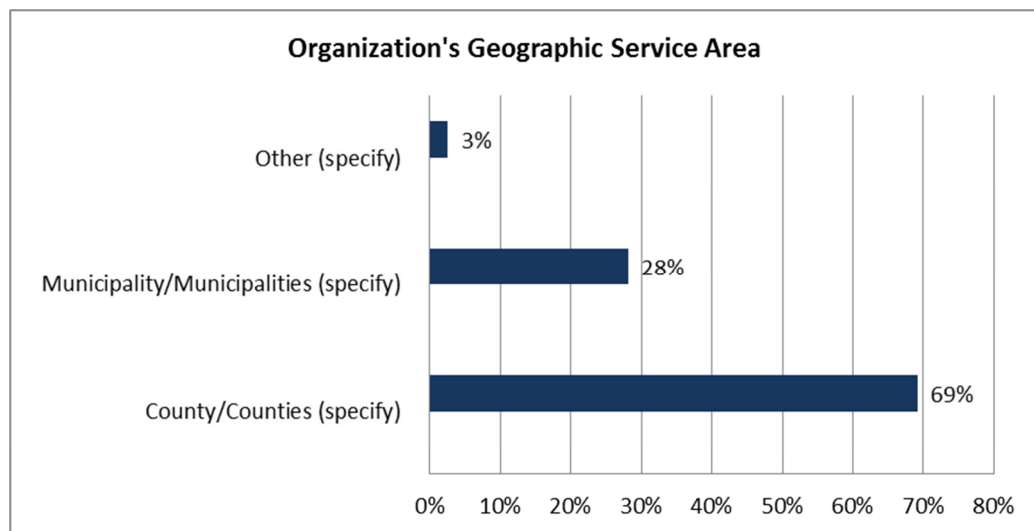

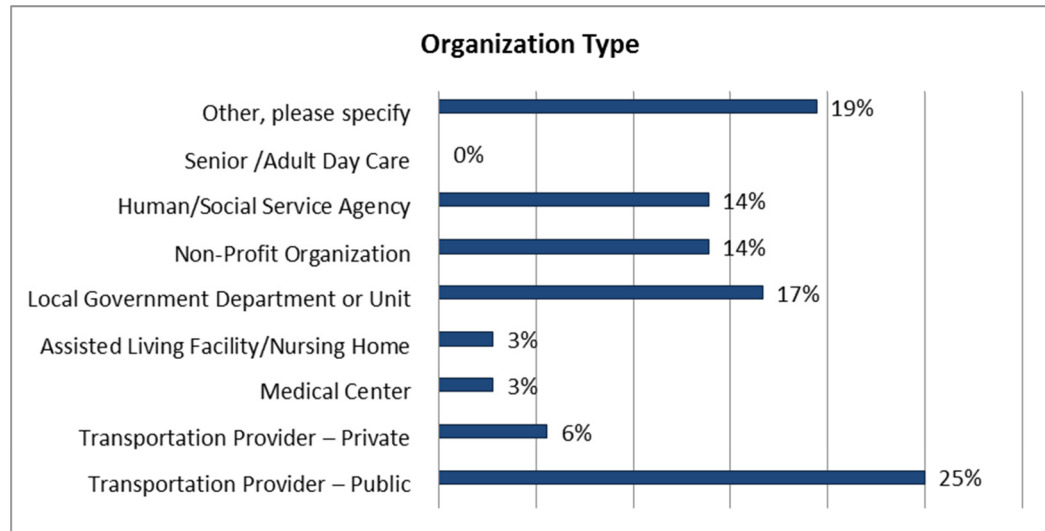

Questions

A total of 12 questions were asked of participants and include:

1. Organization type
2. What is the geographic service area or coverage area for your organization's transportation program?
3. Rate the quality and availability of services
4. How effective are current transit information sources
5. Do you have any suggestions for improvements that would better serve your client base?
6. How well are employment related trips being handled by public transit?
7. What enhancements are most needed to improve mobility in your service area?
8. How have transit issues have changed in our area since 2007?
9. Is the paratransit/disability eligibility process efficient, satisfactory, or in need of improvement?
10. Provide suggestions for improving human services transit and public transit for the disabled, elderly, and lower income individuals.
11. Are you attending (or have you attended) the DCHC-MPO Coordinated Public Transit Update Workshop?
12. Agency contact information

Organizations Represented

Public transportation providers made up the largest single category of respondents, followed by those who classified themselves as “other” (community organizations, demand response advocacy groups, etc.), and local government representatives. Nearly all respondents had a county or municipal geographic service area boundary.

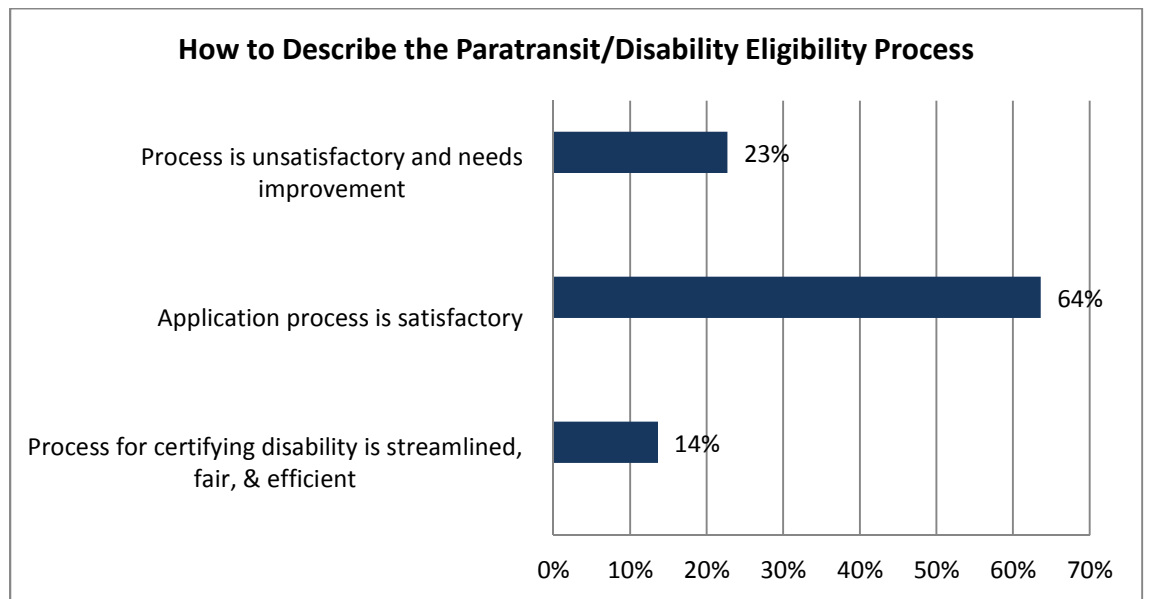

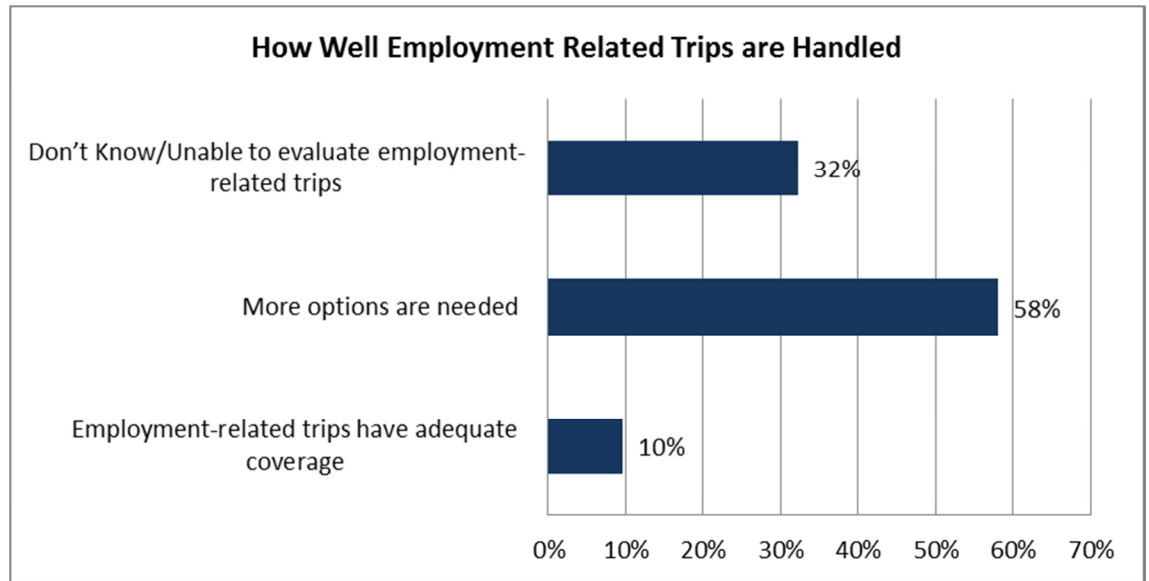

Quality of Services

Of the five services presented to respondents, four were identified by the largest number as in need of improvement. Only “Access to Transit Information” was identified as Fair to Good. When asked how effective sources of information were, all were identified as being Somewhat Effective with Outreach/Information provided by social service providers identified by many as being in need of improvement.

Question #3: Rate the quality and availability of the services below.									
	Excellent		Good		Fair		Needs Improvement		Response Total
	%	#	%	#	%	#	%	#	
Travel Training	0%	0	34%	10	14%	4	52%	15	29
Rural to Urban Transit	0%	0	13%	4	30%	9	57%	17	30
Evening Service Availability	3%	1	29%	9	29%	9	39%	12	31
Access to Transit Information (routes, fares, etc.)	23%	7	35%	11	35%	11	6%	2	31
County-to-County Travel	6%	2	22%	7	25%	8	47%	15	32

When asked how employment related trips are handled by transit providers, more than half stated that more options were necessary for these types of trips. The respondents also indicated that the paratransit application process was, for the most part, satisfactory.

Question #4: How effective are the following sources for transit information?							
	Very Effective		Somewhat Effective		Needs Improvement		Response Total
	%	#	%	#	%	#	
Go Triangle Information Center (regional transit information line)	31%	8	46%	12	23%	6	26
GoTriangle.com (regional website for all public transit providers)	27%	7	54%	14	19%	5	26
Public Transit Providers (individual information lines/websites)	28%	7	56%	14	16%	4	25
Outreach/Information provided by social service providers	4%	1	54%	13	42%	10	24

Changes Since 2007

When asked how the transit system in the DCHC MPO region has changed since the Coordinated Public Transportation - Human Service Transportation Plan was developed in 2007, respondents felt that for most of the choices services have improved slightly or remained consistent. Many indicated that they thought passenger information sources and coordination between transit systems improved greatly.

	Question #8: Please rate how the following transit issues have changed in our area since 2007.								
	Improved Greatly		Slightly Improved		No Change		Issue has Worsened		Response Total
	%	#	%	#	%	#	%	#	
Coordination between transit systems	38%	10	58%	15	4%	1	0%	0	26
Passenger Information Sources	36%	9	60%	15	4%	1	0%	0	25
Transfer Wait Times	17%	4	57%	13	22%	5	4%	1	23
Transit to Employment Centers	9%	2	70%	16	17%	4	4%	1	23
Public Transit Options to RDU Airport	10%	2	45%	9	35%	7	10%	2	20
Bus Stops, Stations, & Shelters	9%	2	57%	13	30%	7	4%	1	23
Spanish Language Outreach	0%	0	58%	11	42%	8	0%	0	19
Universal Fare Card (one card/fare for all public transit)	14%	3	41%	9	45%	10	0%	0	22
Availability/Quality of Private Transit (taxicabs, private medical transit, etc.)	5%	1	45%	9	35%	7	15%	3	20

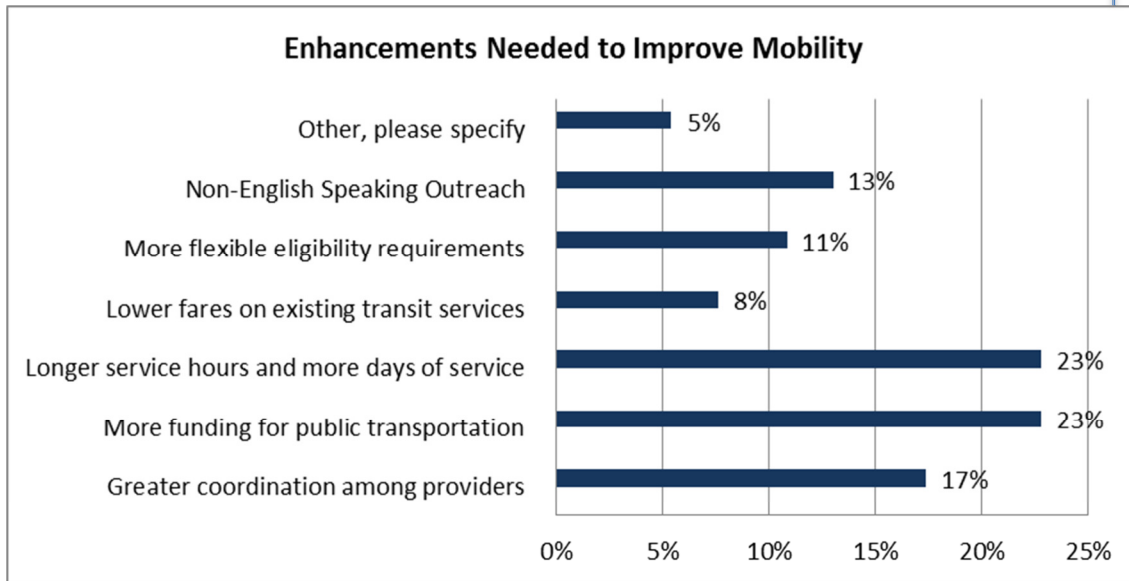

Improvements

Respondents were asked to provide their opinions on the enhancements and changes needed to improve mobility and would help to better serve their clients. The two most desirable enhancements to improve mobility were longer service hours/more days and increased funding for public transportation. Greater coordination among providers and outreach to non-English speaking clients were also chosen as enhancement priorities. Specific suggestions related improvements included:

- More seamless service between rural and urban areas
- More direct outreach and communication
- Better information on making connections from one transit route to another and/or from one system to another, such as signing at stops/hubs, kiosks, printed materials, on-time arrival notification, additional information outlets, etc

- Better coordination among other local and regional transit providers to optimize service and cost effectiveness
- Increased service hours and days
- Better connections for seniors and those with disabilities to destinations such as shopping, social events, and medical facilities
- Better stop facilities such as sidewalk access, shelters, lighting, trash cans, etc

6.5 Review of Other Area Coordinated Public Transportation Plans

There are two other recently adopted coordinated public transportation plans which include transit agencies serving the DCHC MPO region: Durham County (April 2013) and the Triangle Area Rural Planning Organization (TARPO) Locally Coordinated Human Service Transportation Plan (June 2013). These plans were reviewed to determine possible transportation needs and recommendations that might apply to the DCHC MPO region.

Durham County Coordinated Public Transit - Human Services Transportation Plan: The Durham County Plan lists several needs and possible strategies developed through its planning process, including better transportation service for targeted populations, better coordination of services among transit providers, and better marketing material and information on the available services. As a result of this plan, Durham County submitted a Section 5310 grant application to NCDOT to "provide 'capped' or free transportation for transportation-disadvantaged residents of Durham County who are elderly or have a disability." The plan noted that this activity was identified as the highest priority in the workshop and one of the highest priorities in its community transit survey.

TARPO Locally Coordinated Human Service Transportation Plan: The TARPO Plan included two service providers who are also included in this 2013 DCHC MPO Plan Update: Chatham Transit Network (CTN) and Orange Public Transportation (OPT). The TARPO Plan's regional level recommendations include more inter-county cooperation, particularly on medical trips to hospitals in Chapel Hill and Durham; more general-purpose transportation; more door-to-door service for the elderly and disabled; and improved communication to the public and education on available services. The specific recommendations for CTN and OPT both included new and improved fixed route/deviated fixed route services; better early morning/evening service; mobility managers; and better marketing/education.

Both the Durham County Plan and the TARPO Plan include needs that are similar to those identified for the DCHC MPO region, such as the need for increased coordination among transit providers and better outreach and education of available services. These two plans appear to validate the prioritization of those needs identified in the workshop and survey completed as part of this 2013 Plan Update.

7. Findings and Recommendations

7.1 Findings

Based upon the review of existing transit services and transit activities since 2007, and the review of transportation needs identified during the planning process, the following findings have been developed:

1. **The coordination and cooperation of transit services has improved.** Since 2007, the region has seen the introduction of a regional call center and regional transit webpage (GoTriangle.org) that allows users to plan transit trips across various transit providers. Greater coordination between transit systems has led to new fixed route services that are jointly funded and operated, such as the PX Route between Pittsboro and Chapel Hill (CTN/Chapel Hill Transit) and the Hill to Hill route between Hillsborough and Chapel Hill (Chapel Hill Transit, Triangle Transit and OPT). The new GoCard allows riders to have a single fare card that works with different transit providers.
2. **Several initiatives have successfully improved the delivery of services to targeted populations.** In addition to the GoTriangle webpage and regional call center, the New Freedom and JARC grants have allowed for extending bus routes to reach employment areas as well as for improved mid-day and night service that help persons with non-traditional work schedules. New Mobility Manager positions have allowed transit agencies to concentrate on improving customer service and assisting riders, and travel training programs have helped seniors find freedom to do shopping and other activities.

The introduction of the GoTriangle transit information program is seen as successful partnership among the various transit providers in the region.

3. **Greater cooperation and coordination of human service and rural transit systems is needed.** Currently the GoTriangle website does not include information on connections to non-fixed route services. Furthermore, while the human service transportation providers are listed, some of the links to the specific provider's webpage are broken. Stakeholders noted that connections between the rural bus routes and the urban and regional fixed-route services are lacking.
4. **Better outreach, education and training is needed.** As noted, the GoTriangle website has limited information on human service transportation options. Stakeholders noted that travel training is needed on connecting between transit systems, and that much of the available information on the transit services is not in a format that can be easily understood by individuals with limited English or reading skills.
5. **The needs of transportation disadvantaged populations continues to grow in the region.** The percent of the MPO region's population that are part of the targeted groups - older adults, individuals with limited incomes, and persons with disabilities - is increasing. The growth of families below the poverty line has increased, and has occurred all over the DCHC MPO region, including rural areas not served by fixed route transit. Stakeholders noted that not only is employment moving to areas not traditionally served by fixed-route transit, but medical and other social services are as well, placing an increased burden on transit customers and providers.

7.2 Recommendations

The recommendations derived by the planning process for this 2013 Plan Update are categorized under five general areas of need: *Education and Outreach*, *Access to Services*, *Coordination and Cooperation*, *Alternative Funding*, and *Rural-Urban Connections*.

It should be noted that most of these recommendations provided by the survey and at the workshop were focused on service changes. Other activities could improve service efficiencies, such as joint purchases and coordinated training by area transit providers. The suggested recommendations listed in this plan update are only a few of the possible activities or programs that could be implemented to meet these needs. The suggested activities listed here should not be the only actions eligible for federal funding. Transit agencies, human services providers, and area non-profits may develop other activities to best meet these needs, and all reasonable activities should be pursued.

1. **Education and outreach:** There should be improved outreach and education to existing riders and potential riders about the available transit services in the region. Some suggested activities include:

- *Expanded travel training:* The Durham Center for Senior Life offers monthly travel training courses and field trips to teach seniors how to use transit. These trainings have included rides on DATA, Triangle Transit, Chapel Hill Transit and Capital Area Transit buses. The Center is now extending the program to training disabled individuals to help them transition from the DATA ACCESS and DCA systems to using fixed route services. Similar travel training programs should be developed across the MPO region, and the training should be extended to non-urban use and to how to transfer between systems.
- *Expanded regional call center/website information:* Expand the GoTriangle website and regional call center to include more information on the OPT and CTN systems, and paratransit services. Currently some links to paratransit and rural services at the website are broken, and the trip planner function does not include demand response services.
- *Easier to use bus schedules/route maps:* During the workshop stakeholders suggested that the bus schedule and route maps can be confusing to those with limited reading or English skills; they suggested that these materials be made easier and simpler through methods such as rewriting the text to be less academic, and through the use of landmarks and pictures when identifying time points, major stops, or destinations. Transit systems may want to work with non-profits and advocacy groups to determine ways to develop informational handouts or websites that can best meet these needs.
- *More Mobility Manager positions:* Mobility Managers are staff within a transit agency whose job is to concentrate on improving customer service, and develop changes to services that are focused on enhancing the overall travel experience.

- *More outreach on land use decisions and its impact on transit:* In addition to employers locating jobs in suburban and rural areas not served by transit, stakeholders noted that medical facilities and social services are at times relocating to areas that are not served by bus routes. There should be greater education and outreach to local businesses to help them understand the benefits of being located in transit accessible areas. Moreover, zoning and plan review staff should consider transit access especially for transportation disadvantaged populations, when developing zoning and land use plans, rezoning petitions, and other land use decisions.
2. **Better and safer access to fixed-route services:** There should be improved infrastructure to access, wait, and transfer to existing bus services. During the workshop and survey, these improvements were noted particularly for seniors, but would help others as well. Some suggested activities include:
- *Stop improvements* including shelters, lighting, printed schedules, and even neighborhood maps showing destinations and variable message signs (showing next bus arrival).
 - *Sidewalks* to access stops and destinations near stops.
 - *Better crosswalks* and other improvements to allow riders to cross the street.
 - *A data-driven evaluation of where to invest transit infrastructure improvements:* Given the large number of bus stops in the region, transit agencies may want to use demographic data and rider surveys to determine which routes and stops might have the highest use (or highest potential for use) by the targeted groups, and concentrate investments along these routes. Moreover, these improvements could be coordinated with local transportation departments and NCDOT to match the transit stop investments with other "complete streets" improvements in targeted areas. This collaboration would thus allow for a more substantial footprint of the pedestrian and transit infrastructure improvements along key corridors.
3. **Better coordination and cooperation among transit providers:** Suggested activities include:
- *Expanded locations to purchase regional day passes,* and expanding the number of area providers who will access the regional day pass.
 - *Adjustment of schedules* to allow for connections between transit systems at stops served by more than one agency.

- *Better information (schedules, maps) of the varied systems* at transit centers and bus stops that are served by multiple agencies.
 - *A review of manifests among the rural and paratransit agencies* to see where parallel routes and common destinations might allow for an eventual shared-ride or brokered system.
 - *Better efficiencies*, such as joint purchases or training by area transit providers (including non-profits).
 - *Possible consolidation of systems.*
4. **Alternative funding:** Some alternative funding sources should be found to expand services. Some suggested activities include:
- *Universities and colleges:* Work with area colleges, community colleges and universities to fund additional services to and around campuses. These services can not only help college students, but also provide access to job training and employment on or near campuses.
 - *Business collaboration:* Collaborate with employers to help fund bus stop infrastructure near their work sites.
 - *Alternative sources for local match:* Cooperate with non-profits or businesses to fund the local match on new or extended bus services or other improvements.
5. **Better rural services and urban-rural connections:** As the DCHC MPO region grows, there is a greater need for services to areas with lower densities that are often not served by fixed route transit. Some suggested activities:
- *Collaboration of services:* A review of manifests from the rural transit and paratransit agencies might yield clues about parallel routes and common destinations that might allow for an eventual shared-ride or brokered system.
 - *More rural transit services:* A review of recent demographic data shows that seniors are dispersed throughout the MPO area, and that there has been a marked increase in the number of families below the poverty line in areas not served by traditional fixed route transit. A review of commuting data and employment data in the rural areas might reveal possible routes for new rural, general public fixed route services.
 - *More direct connections:* Rural systems should investigate the possibility of more point-to-point services that reduce the need for transfers in downtown.

As stated above, the suggested recommendations listed under these areas are only a few of the possible activities or programs that could be implemented to meet these needs. Transit agencies, human services providers, and area non-profits can and should develop other activities to best address the needs identified in this plan.

Table A-1 Senior and Low-Income Populations by Block Group, 2011

Coordinated Public Transportation – Human Service Transportation Plan Update

Transportation Coordinating Committee

October 23, 2013

DCHC MPO

DURHAM - CHAPEL HILL - CARRBORO - METROPOLITAN PLANNING ORGANIZATION

Gannett Fleming

Presentation

1. Purpose of Plan
2. Review 2007 Plan
3. Plan Update Process
4. Draft Findings
5. Draft Recommendations
6. Moving Forward

Why a Coordinated Plan?

Coordinated Public Transportation - Human Service Transportation Plan

Purpose of Plan

- Improve transportation services through coordination
- Focus on Targeted Groups:
 - Persons with disabilities
 - Older adults
 - Individuals with lower incomes

Purpose of Plan (cont'd)

Transportation grants that require a Coordinated Plan under *previous* federal transportation law (SAFETEA-LU):

Section 5310

Elderly Persons &
Persons w/
Disabilities

1. For transit services that address the special needs of the elderly & disabled

Section 5316

Job Access
Reverse
Commute (JARC)

1. Expand access to jobs in suburban areas
2. Increase transit for unconventional work hours

Section 5317

New Freedom
(NF)

1. Expand Mobility of Disabled People
2. Reduce barriers to transportation

Purpose of Plan (cont'd)

Transportation grants that require a Coordinated Plan under *new* federal transportation law (MAP-21):

Section 5310

Elderly Persons &
Persons w/
Disabilities

1. For transit services that address the special needs of the elderly & disabled
2. Includes New Freedom eligible activities

Section 5307

Urbanized Area
Formula Grants

1. For urbanized areas of 50,000 or more to support transit
2. Includes JARC eligible activities

Top Priorities of the 2007 Plan

1. **Mobility Manager**
2. **Intra-country & Cross-county services (rural to urban)**
3. **Universal Fare Card**
4. **Travel Training**
5. **Unified Regional Paratransit application/certification**
6. **Evening Service (6-10pm) & Late night service (10pm-12am)**
7. **Better on-time performance (fixed route & paratransit)**

Activities Addressing Needs from 2007 Plan

2007 Plan Priority	Funded Activity	Funds Recipients
Mobility Management	GoTriangle regional transit information partnership	Chapel Hill Transit, DATA
Evening & late night service	NS and G bus routes (night service)	Chapel Hill Transit
Better paratransit services	Client Service Improvement	DATA ACCESS
Mobility Management/Travel Training	Mobility Manager Positions	Chapel Hill Transit, Durham County
Travel Training	Travel Training Activities	Durham Center for Senior Life
Intra-county & cross-county services/Better on-time performance	Extension of HS bus route & mid-day service	Chapel Hill Transit
Evening & late night service	Year-round night service (various bus routes)	Chapel Hill Transit
Mobility Management/Travel Training	EZ Rider Senior Shuttle (circulator)	Chapel Hill Transit
Evening & late night service	Extension of evening service, expansion of routes, and increased in bus frequency	DATA
Better paratransit services/Intra-county & Cross-county services	Access Taxicab Supplemental Service	DATA
Unified regional paratransit application process	Paratransit Eligibility Assessment	DATA, Chapel Hill Transit, Triangle Transit
Better paratransit services/Intra-county & Cross-county services	Job Access Transportation Program	Durham County
Better paratransit services/Intra-county & Cross-county services	Work Wheels Work (paratransit for job training/employment)	Susie Taxi

Key Elements of a Coordinated Plan

1. Assessment of transportation needs
2. Inventory of available services
3. Strategies to address problem areas
4. Coordinated actions
5. Prioritization of strategies

Source: FTA

Coordinated Plan Update Actions

1. Reviewed 2007 Plan and activities
2. Revised inventory of available services
3. Stakeholder workshop
4. Survey
5. Reviewed demographics
6. Findings and recommendations

Key Findings

1. Improved coordination and cooperation among services
2. Improved delivery of services to targeted populations
3. Coordination of human service and rural systems needed

Key Findings (*cont'd*)

- 4. Better outreach and training needed
- 5. Needs of transportation disadvantaged population growing

	2000	2011
Families in Poverty	81,350 (8.6%)	99,822 (10.5%)
Seniors	32,688 (9.5%)	42,699 (10.4%)
Total Pop	342,446	412,070

Plan Recommendations

1. Continue to improve education and outreach
 - Expanded travel training
 - Expanded regional call center/website
 - Easier route schedules/maps
 - Mobility Managers
 - Better land use decisions

CENTRAL EASTSIDE ALL-DAY TRANSIT SERVICE

-  **RapidRide B Line & Stop**
Route operates all day with 10-15 minute service from 6 AM to 10 PM.
-  **245 Frequent Service**
Routes operate approximately every 15 minutes or less during most portions of the day.
-  **249 Other All-Day Service**
Routes operate approximately every 30 minutes during most portions of the day.

NOTE: This map does not show weekday routes that operate during peak periods only (6-9 AM, 3-6 PM). Please refer to www.kingcounty.gov/metro.

Plan Recommendations

2. Better and safer access to fixed-route services

- Stop improvements
- Sidewalks
- Crosswalks
- Data-driven evaluation of where to invest infrastructure

Plan Recommendations

3. Further improve coordination and cooperation among providers

- More options for day passes
- Adjust schedules
- Better info on options at transit centers
- Review rural and paratransit provider trip data
- Joint purchases, training, consolidation

Plan Recommendations

4. Leverage alternative funding

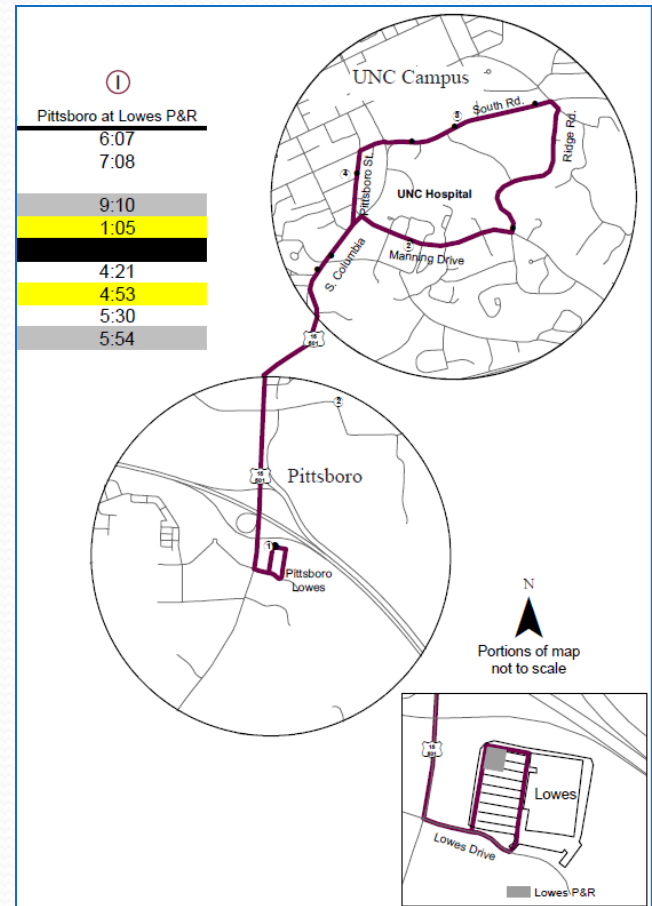

- Universities and colleges
- Business collaboration
- Non-profits

Plan Recommendations

5. Better rural services and rural-urban connections

- Collaboration
- More rural services
- Better point-to-point services

Other Study Elements

- Grant funding options under MAP-21
 - Rural Area Formula Grants (5311)
 - Research, Development, Demonstration and Deployment (5312)
 - Technical Assistance and Standards (5314)
 - Bus and Bus Facilities (5339)
- Best practices for administering grants, project selection
 - 5307 - JARC
 - 5310 - New Freedom

Timeline for CPT-HSTP Adoption

- Oct. 23 – TCC receives draft plan update for review; recommends TAC release draft for public comment
- Nov. 13 – Draft plan update released for public comment
- Dec. 10 – Public hearing
- Jan. 8 – TAC receives final plan update and approves plan

Thank you.

TIP/STPDA Subcommittee - Notes**October 16, 2013****Prioritization 3.0 – Highway**

- October 23, 2013 Deadline to modify an existing project
Joey Hopkins discussed modifications in Division 5 and requested that the MPO confirm if they are in agreement. A follow-up email will be sent.
LPA staff will also follow-up with Division 7 and 8 staff on this deadline.
- December 1, 2013 Local governments provide input to MPO
- December 18, 2013 TCC makes recommendation
- January 8, 2014 TAC submits 15/19 projects to NCDOT

Notes: Projects due at NCDOT by end of January 2014
 MPO can submit 14 projects (plus up to 5 projects if pull out same number from existing pool)
 Projects in current SPOT inventory will remain in new SPOT prioritization.

LPA staff will compare the existing highway project list to the 2040 MPO project list and note any discrepancies or missing projects and share with the TCC.

Prioritization 3.0 – Rail

- December 1, 2013 Local governments provide input to MPO
- December 18, 2013 TCC makes recommendation
- January 8, 2014 TAC submits 5 projects to NCDOT

Notes: MPO can submit 5 projects.

The Hillsborough Train Station and grade separation projects in Durham will be submitted.

Prioritization 3.0 - Transit

- October 15, 2013 Local governments and systems submit projects to MPO
CHT, DATA, and Triangle Transit have sent the LPA staff lists. DATA and Triangle Transit will revise their list to include previously submitted projects. The MPO is waiting to receive submittal instructions from NCDOT. Additional project information may be requested. Natalie Murdock will send a link to an online form on the PTD website.
- October 23, 2013 TCC makes recommendation
- November 13, 2013 TAC submits projects to NCDOT

Notes: Projects due at NCDOT by November 15, 2013
 MPO can submit unlimited number of projects; projects in current SPOT inventory are deleted.
 Submit projects needed over next 5 years (2016-2020)

Patrick McDonough requested that the MPO summarize the potential funding available in the different STI categories for transit. Triangle Transit may modify their request for state match funding for the light rail project to fit within the parameters of the STI legislation.

Prioritization 3.0 – Bike/Ped

September 20, 2013	Local staff submits projects to MPO
September 25, 2013	TCC makes recommendation for release to public
October 9, 2013	TAC releases project list for local input
December 1, 2013	Local governments provide input to MPO
December 18, 2013	TCC makes recommendation
January 8, 2014	TAC submits 20 projects to NCDOT

Notes: Projects due at NCDOT by end of January 2014

MPO can submit 20 projects; projects in current SPOT inventory are deleted.

Need to include Safe Routes to School eligible projects.

LPA staff recommends considering most previous “highway modernization” projects as bike/ped projects for Prioritization 3.0.

The Subcommittee agreed that Chapel Hill, Carrboro, Hillsborough, Orange County, and Chatham County should provide the MPO their top 4 projects (include at least 2 SRTS eligible projects) and Durham and Durham County should provide the MPO their top 8 projects (include at least 4 SRTS eligible projects). LPA staff will then score these 36 projects for consideration in developing our 20 submitted projects.

Joey Hopkins noted that each Division gets to submit up to 20 projects as well. The Division would only want to submit projects for which the local governments are willing to provide the local match and manage as NCDOT is not allowed to provide the local match. Thus, projects that do not make the MPO’s top 20 list may be able to be submitted by the Division. LPA staff will follow-up with Division 7 and 8 staff to discuss this option as well.

Dale McKeel suggested that we request more than 20 submittals since SRTS is also included. There may be a significant amount of SRTS funding available – maybe \$16 M. LPA staff will request that NCDOT provide an estimate of SRTS funding from NCDOT. David Bonk asked if SRTS projects can still be both capital and programmatic. LPA staff will ask NCDOT. David Bonk also asked about previously submitted SRTS projects. NCDOT staff sent a memo that says that projects submitted to the Divisions prior to August 1, 2013 will be reviewed.

Jeff Brubaker asked if the MPO could submit projects in both the highway and bike/ped categories. LPA staff will ask NCDOT.

Prioritization 3.0 – Future Steps for Developing Local Input Points

January – April	Develop and approve local ranking methodology
March 26, 2014	TCC makes recommendation on local ranking methodology
April 9, 2014	TAC approves local ranking methodology
April 30, 2014	NCDOT releases quantitative scores
May 1, 2014	NCDOT deadline for approval of local ranking methodology
May 1-May 13	LPA applies local ranking methodology
May 14, 2014	TAC releases proposed public input points for public comment
June 11, 2014	<i>TAC holds public hearing on public input points *evening meeting*</i>
June 25, 2014	<i>TCC makes recommendation on local input points</i>
July 9, 2014	<i>TAC approves local input points *requires July TAC meeting*</i>
July 31, 2014	<i>MPO submits local input points</i>

Or

May 28, 2014	<i>TCC makes recommendation on local input points</i>
June 11, 2014	<i>TAC holds public hearing on public input points and approves local input points *evening meeting*</i>
July 31, 2014	<i>MPO submits local input points</i>

David Bonk suggested that we ask FHWA if the State law that says the NCDOT must approve local ranking methodologies is allowed under federal law. Although NCDOT's guidelines are quite flexible, many Subcommittee members disagree with the premise that the State has this authority over MPOs.

Margaret Hauth suggested that we ask the TAC if they would consider switching the TCC and TAC meeting dates each month in order to better accommodate the State's schedule which has many deadlines occurring at the end of each month. LPA staff will bring this to the TAC's attention and request feedback on what they prefer.

STPDA

- Last held Call for Projects in 2008 for estimated FY 2009-2015 funding. Used a distribution methodology that was partly competitive and partly a formula.
- All jurisdictions “front-loaded” their projects in 2009-2013. Many projects have been delayed several years. MPO set a FY 2014 deadline for the use of funding. Funding is not committed to any projects with federal authorization delayed beyond FY 2014. Several projects may not meet this deadline. These projects may be eligible for funding from the next Call for Projects if desired and don't necessarily need to be cancelled.
- July 2013 unobligated balance: \$9,573,356
 - *LPA staff will create and estimate of how much of this funding is expected to be obligated in FY 2014.*
- Estimated annual appropriation $\$4,840,855 * 0.9 = \$4,356,770$
- Ideas for next Call for Projects:
 - Minimum project size
 - Competitive process or formula?
 - Multiple needs, limited funds, what are our priorities?

- Routine planning
- Planning special projects
- Transit capital
- Transit planning
- Regional bicycle and pedestrian
- Local bicycle and pedestrian
- Incentive to obligate funds in a timely manner
- Fewer STP-DA/TIP amendments
- How to address cost over-runs

TAP <http://www.fhwa.dot.gov/map21/guidance/guidetap.cfm>

- TIP Amendment:
 - Change description of U-4726 in TIP to “VARIOUS. DCHC MPO: BICYCLE, PEDESTRIAN, AND TRANSPORTATION ALTERNATIVES PROGRAM (TAP) - ELIGIBLE PROJECTS.”
 - Or Add new TIP project U-5531 only for TAP projects
- MAP-21 annual allocations for FY 13 and 14 are 390,077 meaning we have $2 * 0.9 * 390,077 = \$702,138$
- We can estimate future allocations
- Project eligibility generally the same as STP, but cannot be used for MPO administrative purposes.
 - “The TAP provides funding for programs and projects defined as transportation alternatives, including on- and off-road pedestrian and bicycle facilities, infrastructure projects for improving non-driver access to public transportation and enhanced mobility, community improvement activities, and environmental mitigation; recreational trail program projects; safe routes to school projects; and projects for planning, designing, or constructing boulevards and other roadways largely in the right-of-way of former Interstate System routes or other divided highways.”
- Must be selected through a competitive process

The Subcommittee discussed using the same or similar criteria to evaluate projects for Prioritization 3.0, STPDA, and TAP. The consensus of the Subcommittee was that it would be best to group TAP and STPDA funds together and allocate using the same process due to the small size of the TAP program. The MPO has already selected CMAQ projects for funding through FY 2017. The next Call for Projects will include our unobligated and uncommitted STPDA funding balance, FY 15 and 16 estimated STPDA funding, FY 13 and 14 TAP funding, and estimated FY 15 and 16 TAP funding.

Local boards would like to know the necessary local matches for their FY 15 budget development by early spring 2014. Thus the Call for Projects will be on a similar schedule as the Prioritization 3.0. Local governments should ask their local boards to identify projects for consideration for STPDA and TAP funding at the same time as Prioritization 3.0. Local governments in Orange and Chatham counties can submit up to 6 additional bike/ped projects for STPDA/TAP. Local governments in Durham County can

submit up to 12 additional bike/ped projects for STPDA/TAP. Projects submitted for Prioritization 3.0 will be included in the STPDA/TAP Call.

Transit projects from Prioritization 3.0 will also be considered in the STPDA/TAP Call. It was noted that replacement vehicles may be very much in need of STPDA funding as other federal funding is limited.

POLICY FRAMEWORK FOR DCHC-MPO'S FEDERAL FUNDS

Under the federal Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (SAFETEA-LU), the Durham-Chapel Hill-Carrboro Metropolitan Planning Organization (DCHC-MPO) is responsible for programming and maintaining the seven-year Metropolitan Transportation Improvement Program (MTIP), coordinating updates of the State Transportation Improvement Program (STIP) and selecting projects to receive funds from three federal funding programs:

- Surface Transportation Program – Direct Apportionment (STP-DA)
- Congestion Mitigation and Air Quality (CMAQ)
- Federal Transit Administration (FTA)

Under SAFETEA-LU, DCHC-MPO is required to document the process used for programming these funds. The “Policy Framework for the DCHC-MPO’s Federal Funds” provides policy direction and guidelines for the recommendation and selection of projects to receive DCHC-MPO funds. In addition to more general policy direction, this Policy Framework contains specific information for DCHC-MPO’s project selection process for programming DCHC-MPO funds, as part of the development of the TIP. This policy focuses and provides guidance for programming DCHC-MPO funds and support implementation and tracking of projects established in the MPO’s Long Range Transportation Plan, the 2035 *LRTP*, adopted on May 13, 2009.

Transportation Improvement Plan (TIP)

The TIP contains the transportation project list developed and approved through the MPO’s decision-making process. The TIP is focused on the development and implementation of projects that are part of or directly support key local and state transportation policies and plans, including designated projects in the 2035 *LRTP*. Under federal law, the TIP must be a four-year program of projects that is updated at least every 2 years. At a minimum, federal and state legislation requires a Metropolitan TIP to contain all of the transportation projects requesting federal transportation funding under Titles 23 CFR (Highways) and 49 CFR (Transit) in the United States Code, as well as all the non-federally funded, significant projects. The 2012–2018 TIP will therefore include:

- Projects using federal funds managed by DCHC-MPO (STP-DA, CMAQ, and FTA).
- Projects using federal and state funds managed by NCDOT.
- Projects of significance, regardless of funding source, required to be included in the air quality analysis and conformity determination of the TIP.

- Projects carried forward from the previous TIP funding, with funds not yet obligated.

As part of the development of the TIP, DCHC is responsible for reviewing all projects submitted for programming. DCHC has primary responsibility for selecting projects to receive DCHC-managed federal funds from the STP-DA, CMAQ, and FTA federal funding programs.. The process is summarized in the subsequent sections of this policy.

DCHC-MPO Funds - Eligibility Requirements

As previously stated, DCHC is responsible for selecting projects to receive STP-DA, CMAQ, and FTA funds. Each federal funding program has specific eligibility requirements, as follows:

- STP-DA funds are the most flexible of DCHC funds and can be used for a variety of transportation projects, transit projects, and planning activities.
- CMAQ funds are available for specific categories of transportation projects and programs that improve air quality by increasing the efficiency of existing transportation facilities or reducing travel demand on those facilities. General purpose roadway projects are not eligible.
- FTA funds may be used *only* for transit related projects serving the DCHC's federal urbanized areas.

DCHC-MPO Funds - STP-DA Funding Proposal

In 2008 the MPO adopted the following three step process for establishing an annual STP-DA funding proposal. The Technical Coordinating Committee (TCC) recommends to the Transportation Advisory Committee (TAC) approval of the distribution of funds to projects via this process.

Step 1 – Distribution guidance

The MPO funds identified are distributed through a partially competitive and non-competitive process. This process is based on the requirements of current transportation legislation, with additional guidance provided by the *2035 LRTP*, the MPO's long-range metropolitan transportation plan and other local comprehensive plans.

The process begins with the calculation of our "expected" annual STP-DA funds available. It is calculated by combining our annual allocation over the 7 year period with any prior year uncommitted balance. The total "expected" STP-DA funds available is initially reduced by the following items:

1. *Annual Reserve (15%)*- distributed to participating members on a competitive basis
2. *Staff and Routine Planning needs* - funding level varies depending on LPA needs
3. *Extra Planning needs* - funding level varies depending on LPA needs

After those items have been accounted for, the "remainder" of STP-DA funds is allocated to 3 sub-categories as follows:

1. 25% to *Transit* (non-competitive split: 50% Chapel Hill Transit, 50% Durham Area Transit Authority)
2. 25% to *Regional Bicycle and Pedestrian* (competitive – for projects of regional scale and importance)

3. 50% to *Local Discretionary* (distributed to participating members on a non-competitive basis)

Step 2 – Distribution of STP-DA within the each distribution category

Annual Reserve (Small Projects) – This category is intended to be used for short-term immediate needs and small projects. No guidelines have been proposed for distribution by jurisdiction so that the MPO has flexibility in responding to immediate needs that may vary significantly from year to year.

Staff and Routine Planning – This category is for LPA staff and routine planning activities either performed by the LPA or by other agencies (TJ COG or the Model Service Bureau) on behalf of the LPA. There is no need for guidelines for the distribution of funding within this category because all funding is for MPO-wide activities – no funding is allocated to individual jurisdictions.

Extra Planning – This category is for special emphasis projects either performed by the LPA or member jurisdictions. This category is for larger, more expensive planning projects that will enhance transportation planning in the MPO but are not required. No guidelines have been proposed for distribution by jurisdiction. All of the projects that have been approved are for MPO-wide activities.

Transit - The TAC approved an even distribution of STP-DA funds within the transit category between Chapel Hill Transit and DATA

Regional Bicycle and Pedestrian – There is no distribution formula for funding within this category. Projects in this category will span across multiple jurisdictions or otherwise provide regional benefits through increased connectivity.

Local Discretionary – For the local discretionary category, the TAC approved a guaranteed \$500,000 minimum for each municipality over the 7-year TIP and then distribution of the remainder proportionate to municipal population

Step 3 – Allocate STP-DA funds to specific projects within each category

All funding of specific projects within each category must be presented to the TAC for approval. There is no sub-allocation of funding directly to member governments.

These first 3 categories are approved annually with the UPWP process:

Annual Reserve (Small Projects) – Each member agency will submit new or continued projects annually for this category.

Staff and Routine Planning – The LPA Staff will submit estimated staffing and routine planning activities annually for this category.

Extra Planning – The LPA Staff will submit new or continued projects for this category.

These next 3 categories are typically approved bi-annually with the MTIP process; yet amendments can be made in the interim as needed:

Transit – Transit agencies will submit projects for the TCC to develop a recommendation for the transit category.

Regional Bicycle and Pedestrian – LPA staff and each member agency will submit new or continued projects for this category. LPA formally identified regional connections as part of the 2035 LRTP.

Local Discretionary – LPA staff and each member agency will submit new or continued projects for this category. The TAC will approve with the added expectation that offers municipalities flexibility in funding projects that reflect their own priorities.

DCHC-MPO Funds – STP-DA Project Approval Process

DCHC has an established process for recommending and selecting projects to receive DCHC funds. STP-DA funds are distributed based on the aforementioned funding proposal methodology and the following funding policy that was adopted by TAC in 2003:

“Funding priority will be given to projects in the adopted DCHC Long Range Transportation Plan in the following categories and not for roadway projects:

----Public Transit, Bicycle and Pedestrian Facilities, Transportation System Management/Transportation Demand Management / Intelligent transportation Systems, Scenic and Environment enhancements, Planning Studies that support the implementation or development of the adopted and future versions of DCHC's Long Range Transportation Plan, & Air Quality Programs

When projects are being considered, equity and funding in jurisdictions over time will be considered.”

Projects that are submitted for funding requests will be given priority separately according to the seven project groups and the following guiding principles:

1. Annual Reserve (Small projects), includes:
 - a. LPA and local government planning activities under \$200,000 (federal)
 - b. Bicycle, pedestrian and transit projects under \$200,000 (federal)
 - c. Cost over-runs and additions to existing projects
 - d. These are projects that require less advance planning and can be completed quickly.

2. LPA staff requests and LPA and local government routine planning activities, includes:
 - a. New and existing LPA staff positions
 - b. Activities that are required to be completed such as air quality planning, congestion mitigation plan, modeling, etc.

3. LPA and local government extra planning activities, include:
 - a. LPA and local government planning activities over \$200,000 (federal)
 - b. Optional activities such as special emphasis projects
4. Transit projects over \$200,000 (federal)
5. Regional bicycle and pedestrian projects
 - a. Projects of regional scale and importance that span or connect multiple jurisdictions.
6. Local Discretionary –This is the most flexible category. Projects can include:
 - a. Large bicycle and pedestrian projects
 - b. Scenic and environmental enhancements to highway TIP projects
 - c. Transit projects
 - d. Planning projects
7. Travel demand management - Funding for the TDM will be shared equally by CAMPO. The MPO's share of TDM for FY 2009 and future years will be provided using CMAQ funds. TDM offers very high air quality benefits and competes very favorably for CMAQ funding. Future CMAQ funds have been approved for FY 2013 through 2015 for TDM.

DCHC-MPO Funds – CMAQ Funding

Federal CMAQ funds are apportioned annually to each State according to the severity of its criteria air problems. The CMAQ program is funded by the Federal Highway Administration (FHWA); therefore CMAQ projects must follow Federal laws and regulations. Since transportation and environmental program priorities fluctuate, a limited portion of CMAQ apportionment can be transferred to other Federal-aid highway programs such as:

- Surface Transportation Program (STP)
- National Highway System (NHS)
- Highway Bridge Program (HBP)
- Interstate Maintenance (IM)
- Recreational Trails Program (RTP)
- Highway Safety Improvement Program (HSIP)

The transfer of funds has specific monetary provisions and will differ each year. It is also a requirement that any transfer of such funds must still be obligated in nonattainment and maintenance areas. The MPO plans to explore the option of transferring funds.

The CMAQ program is based on a competitive process for which proposals for candidate transportation projects are submitted to North Carolina Department of Transportation (NCDOT). MPO's and RPO's responsible for transportation planning in air quality non-attainment & maintenance areas are encouraged to work cooperatively with their member jurisdictions to develop & submit project proposals. There is currently a minimum project threshold of \$100,000.

Transit project(s) selected as part of the CMAQ competitive process are flexed to the Federal Transit Administration (FTA) and retain the funding laws and regulation under the CMAQ program. FTA is ultimately responsible for the administration of flexed CMAQ funds.

Project Tracking System

DCHC would like to implement a Project Tracking System to monitor the progress of DCHC's STP-DA, CMAQ, and FTA funds. The following is a proposed tracking system. The project tracking policies contained within this document apply to the following federal funds for which the DCHC has primary responsibility for project selection through the current congressional appropriations bill:

- Surface Transportation Program Direct Attributable (STP-DA),
- Congestion Mitigation and Air Quality Improvement Program (CMAQ), and
- Federal Transit Administration (FTA) – Section 5307

The purpose of the project tracking system is to ensure the timely use of all MPO managed federal funds (referred to as "MPO funds"). Four (4) important goals of the system are to:

- Implement approved qualified/quantifiable projects
- Identify the reasons and accountability for, and possible solutions to, project delays
- Ensure a consistent process is followed for any distribution of MPO funds
- Ensure minimal impact to DCHC's UZA in the event of future rescissions

Each project sponsor will be responsible for identifying the appropriate estimated obligation date for each phase of their project receiving MPO funds and update as necessary via the project tracking database. A one-year grace period beyond the estimated obligation date is established for each project. The estimated obligation date identified by each project sponsor, once funds are programmed in the Transportation Improvement Program (TIP), is used to monitor the progress of the funds and the projects.

This project tracking system will monitor *the obligation* of STP-DA and CMAQ funds, as well as the timely realignment of these funds when necessary. A decision on the need to develop policies and procedures for monitoring the expenditures of STP-DA will be instituted at a future date. LPA staff is currently working to develop a CMAQ project evaluation analysis policy. This policy will monitor CMAQ projects to evaluate whether or not they have met their intended objectives and will also be used in decisions for future CMAQ funding. This policy will be instituted begin with the FY2011 UPWP reporting cycle.

Policies - Obligations & Monitoring

A. Obligation Monitoring of STP-DA and CMAQ Funds

Each phase of a project with STP-DA and/or CMAQ funds is allowed a one-year grace period beyond the allocation year. If project funds remain un-obligated by the end of this grace period, funds are at risk of being removed from the project. The MPO staff will provide regular reports to both the TCC and the TAC of those projects with STP-DA and/or CMAQ funds that are approaching this milestone. These reports

will include information on the age of the funds, the phases programmed, and the length of time passed beyond the estimated obligation date (i.e., months “past due”).

LPA staff will notify the project sponsor when any STP-DA or CMAQ funds are six months past the estimated obligation date (before the one-year grace period expires). The project sponsor will be required to prepare a narrative outlining the reasons for the delay in preparation for presentation to the TCC. The LPA staff, along with the TCC’s input will determine whether or not an obligation date extension is warranted.

1. The length of any obligation date extension will be determined on a case-by-case basis and may be allowed for any date within the 7-year time span of the current TIP. The TCC will then make a recommendation to the TAC.
2. If the LPA staff and subsequent TCC determination is that an obligation date extension is not warranted, the recommendation to the Committee will be to remove the funds in question from the project. Project sponsors will be provided the opportunity to present their case to the Committee if they choose to appeal the recommendation. The LPA Staff will be regularly notified well in advance of all delayed projects with “at risk” funds via the reports mentioned above, and will be taking action on all subsequent activities. Any redistribution of these funds will follow the policies contained in Section E of this document.
3. LPA staff will obtain a monthly report from NCDOT that will be used to develop a report to reconcile project obligations. This will provide a “real-time” status of project obligations.

B. Expenditure Monitoring of STP-DA and CMAQ Funds

A decision on the need to develop policies and procedures for monitoring the expenditures of STP-DA will be instituted at a future date. LPA staff is currently working to develop a CMAQ project evaluation analysis policy. This policy will monitor CMAQ projects to evaluate whether or not they have met their intended objectives and will also be used in decisions for future CMAQ funding.

C. Obligation and Expenditure Monitoring of FTA Funds

These funds include STP-DA and CMAQ funds flexed from FHWA. The TAC will approve the flexed amount each year at the first meeting for the federal fiscal year. (Typically October TAC meeting) Once the TAC has approved the flexed amount, the request is made through NCDOT-PTD to transfer (flex) these funds, making them available through the FTA grant application process.

1. Each transit agency receiving funding will submit an application to FTA via the Transportation Electronic Award Management (TEAM) system within 45 days of TAC’s authorization. The application is used to obligate Section 5307 funding for approved project (s) (*The application will be assigned a 10-digit application number beginning with NC-90-XXXX-XX*)
 - a. Any time there is an application amendment; updated copies must be sent to DCHC.
2. Each transit agency must forward a copy of the approved application and certificate of award/grant agreement to DCHC within 30 days of receipt of FTA documents.

3. The mandatory reports and applicable due dates are as follows:

1st Quarter - due Feb. 15th;
2nd Quarter - due May 15th;
3rd Quarter - due Aug. 15th;
4th Quarter - due Nov. 15th

- a. **Narrative reports** - Each transit agency must forward a copy of their quarterly narrative reports to DCHC according to the deadlines dictated above. *(The standard FTA narrative report includes complete project information, the Federal Financial Report (SF-425) and a Milestone/Project Progress report.*
- b. **UPWP Detail Composite Report** - Each transit agency/participating member government must complete the detailed composite expense report in the standard UPWP task format according to the deadlines dictated above.
- c. **Project Funds/Status** - Each transit agency will forward a “print-screen” copy of the Project Funds/Status – Project funding tab only to DCHC according to the deadlines dictated above. *(This report will give details on obligations, disbursements, de-obligation & refunds over the life of the project.)*

D. Scope Changes to Projects Awarded STP-DA, CMAQ and/or FTA Funds

Requests for a change in scope for a project that received DCHC funds must be submitted to the TCC for evaluation. All projects awarded CMAQ funds were selected via a competitive process based upon the expectation that the project as described in the grant application would be delivered in the time frame specified. During the selection process of CMAQ projects, each project went through an extensive sub-committee review and quality analysis. As a result, proposed scope changes may have consequences that require careful review and evaluation by LPA staff before they can be recommended for approval.

If a change is requested such that the MPO funds will implement some reduced scope of the existing project, the project sponsor will be asked to provide information on their intent to complete the full project and the request will be sent to the TAC for approval. An existing project’s scope may not be modified so substantially as to effectively constitute a new project. This will be reviewed on a case-by-case basis, but a change in location or outcome may be considered a new project (e.g., changing the scope from a high occupancy vehicle lane to a general purpose lane). A key factor will be how the project was described and evaluated during the competitive process – any scope changes will then be reviewed to determine if the project is essentially meeting the spirit of the original evaluation.

E. Distribution of New and “Returned” STP-DA, CMAQ and FTA Funds

New and “Returned” funds are defined as follows:

1. **New funds** are defined as additional funds to the MPO/UZA from the reauthorization of SAFETEA-LU or other sources.
2. **Returned funds** may originate from several sources: un-committed funds remaining from each project category, unused funds from completed projects, unused funds remaining from cancelled

projects, or funds “returned” from projects due to a variety of reasons (such as an indefinite delay to a project, a change in priorities, or the receipt of other funding sources).

The TCC and TAC will approve the following:

- A MPO wide STP-DA contingency lists of prioritized projects. In the event that additional funds become available through the reauthorization of the federal transportation act, the project tracking system, or any other sources, these contingency lists will become effective. The contingency projects must also be already included in the current TIP, and will remain in effect (unfunded) until the next project selection process, to be considered for more distributed MPO funds. The contingency lists should encompass projects through-out the MPO.
- A MPO wide CMAQ contingency list will be retained based on originally submitted proposals that met the program requirements during the current competitive selection process, but were otherwise unable to be funded due to funding availability.

The FTA funds distributed noncompetitively will not be affected by this policy, yet transit projects may be highly considered as contingency projects due to the increased ability to obligate these funds/projects.

Adopted by TAC *June 9th, 2010*.

MEMORANDUM

To: Transportation Advisory Committee (TAC)
DCHC MPO

From: DCHC MPO Lead Planning Agency

Date: October 9, 2013

Subject: **Lead Planning Agency (LPA) Staff Report**

This memorandum provides a summary status of tasks for projects in the FY 2013-2014 Unified Planning Work Program.

- Indicates that task is ongoing and not complete.
- ✓ Indicates that task is complete.

FY 2013-2014 Unified Planning Work Program (UPWP) – Projects

Comprehensive Transportation Plan (CTP)

- ✓ Draft CTP –December 2012
- CTP Report and Maps – December 2013
- MPO Adopt CTP – June 2014
- NCDOT BOT – December 2014

MPO Community Viz. Scenarios Planning and Visualization -2.0

- ✓ Funding for local Community Viz 2.0 preparatory work – July 2013
- Work Plan for Community Viz 2.0 – 2014
- Community Viz 2.0 completed – 2015

Update of the MPO Public Involvement Policy

- Update of the MPO Public Involvement to reflect Map 21

MPO Title VI/Environmental Justice (EJ)/Limited English Proficiency (LEP) Plan

- Update of Title VI/ LEP/EJ plans

SE Data Update – Employment /Housing/Population Verification

- 2013 Base Year Population and Employment – January 2014
- SE Data Forecasts – 2014

Base Year Data Collection (Traffic/Travel Time/Crash/Transit)
